

Block Placement Practice

Builder Basics · Bonus · about 20 minutes

⚙️ The switch is **ON**. The agent draws while it walks!

1 · Move = Blocks 🧠

The switch **place on move** is ON. It stays ON.

The agent...	It drops...
moves 🚶	■ ■ ■ blocks
turns 🔄	nothing (it stays still)

Move = blocks. Turn = no blocks.

2 · Circle It

move forward by 3 . Circle one:

   **3 blocks ·**  **no blocks**

turn right . Circle one:

 **1 block ·**  **no blocks**

move forward by 2 . Circle one:

 **1 block ·**   **2 blocks**

3 · Make a Corner

The agent walks, turns, then walks again:

```
move forward by 3  
turn right  
move forward by 3
```

The trail looks like this:

Count them. How many blocks? Circle one: 3 · 6 · 9

What made the trail bend? Circle one: move forward · turn right

Did turn right drop a block? Circle one: yes · no

4 · Go Up 📈

move up is a step too. So it drops blocks too!

Walk, up, walk, up = **stairs** 📈

```
move forward by 1
move up by 1
move forward by 1
move up by 1
```

Stairs go... circle one: up ⬆ · down ⬇

How many blocks do these 4 steps drop? Circle one: 2 · 4 · 8

5 · Show Your Work 📷 🎥

1. Open your world.
2. Turn the switch **ON**. ●
3. Make the agent **move, turn, move**.
4. Watch the corner! ▴

Record **one video**. Show your trail.

Say these out loud, filling in the blanks:

Today I built _____.

My block was _____.

Move means _____.

Turn means _____.

The most fun part was _____.
