

AI001 Week 1 — English Worksheet

Topic: First Prompt — Meeting Replit Agent · **Course:** AI Coding with Replit Agent · **Time:** about 45 minutes

This week you meet your AI builder, **Replit Agent**. You do not type code. You type a **prompt** — an instruction in plain words — and the AI builds a web page for you.

1 · Predict 🧠

Read each prompt. Before you imagine the AI building it, write what you think will appear on the screen.

Build a simple web page that shows "Hello World".

What will be on the page? Just words, or pictures too?

Build a web page. The title says "Hello World", the background is light yellow, and the text is dark green.

How is this result different from the first one? What changed?

Make a page.

This prompt is very short. What might go wrong? Will you get exactly what you pictured?

2 · Spot the Weak Prompt 🐉

Each prompt below was meant to get a clear result, but it is too vague or missing something. Read what the student **wanted**, then rewrite the prompt so the AI knows exactly what to build. After that, explain why the first one was weak.

Prompt A — The student wanted a page that says their name, **Minji**, in big letters.

Make my name.

Hint: the AI does not know your name, the size, or that you want a web page.

Write a clearer prompt:

Why was the first one weak? Why does yours work better?

Prompt B — The student wanted a page with a **blue background** and **white text** that says "Welcome".

Make it blue.

Hint: make *what* blue? And what should the page say?

Write a clearer prompt:

Why was the first one weak? Why does yours work better?

Prompt C — The student already has a "Hello World" page and now wants the **text bigger** and the **background pink**.

Change everything.

Hint: name the two things you want changed.

Write a clearer prompt:

Why was the first one weak? Why does yours work better?

3 · Try It and Show Me 📷

Open Replit and turn on the Agent. Build a web page with **your own name** on it, using only prompts. Try changing the background color and making the text bigger by writing a second prompt.

When you finish, come back here. Send a **photo or video** of your page, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

My first prompt asked the AI to ...

When I read the result, I saw ...

My second prompt changed ...

One word I added to make it clearer was ...

Something surprised me when ...

If I had more time, I would ...

4 · Save Your Prompts

Write down the **exact prompts** you used today, word for word. You will reuse and improve them in later weeks, so keep them.

Prompt 1:

Prompt 2:

Prompt 3 (if you wrote one):

Submit 

Send this worksheet + a photo (or video) of your page + your prompt list to teacher on KakaoTalk.
