

RB001 Week 4 — English Worksheet (Beginner)

Topic: Conditionals — the Magic Door · **Course:** Obby Architect · **Level:** Beginner · **Time:** about 30 minutes

This week you learned **if / else**. The code asks a question — if the answer is true, one branch runs; if not, the **else** branch runs. You used this to build a magic door.

1 · Predict 🧠

Read the script. Before you run anything, circle or write your answer.

```
local door = script.Parent

local function onTouch(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        door.Transparency = 0.8
        door.CanCollide = false
    end
end

door.Touched:Connect(onTouch)
```

A player touches the door. Does the door open? Circle one: yes · no

Why?

```
local password = "magic"

if password == "magic" then
    print("The door opens")
else
    print("The door stays shut")
end
```

Does **The door opens** print? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The script should check the password. Count the equals signs.

```
-- clean
if password == "magic" then
    print("The door opens")
end
```

```
-- buggy
if password = "magic" then
    print("The door opens")
end
```

What is wrong?

Pair B — Every `if ... then` needs its own `end`. One is missing in the buggy version.

```
-- clean
if humanoid then
    door.CanCollide = false
end
```

```
-- buggy
if humanoid then
    door.CanCollide = false
```

What is wrong?

3 · Fill the Gap

The door should open when a Humanoid is found. One word is missing. Fill it in using the word bank.

```
if humanoid ____  
    door.CanCollide = false  
end
```

Word bank: then · else · end

Write the missing word:

The if block needs its closing word. One word is missing.

```
if humanoid then  
    print("Welcome, player!")  
____
```

Word bank: end · then · local

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your own obby in Roblox Studio. Build a magic door — when a player touches it, it turns see-through and lets them walk through. When you finish, come back here.

Send a photo or video of your magic door, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My `if` checks whether ...

When the condition is true, the door ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while a player walks through your magic door. Talk like you are teaching a friend. Try to use these words: **if**, **else**, **condition**, **true**.

1. Run the game and walk into your magic door.
2. Read your **if humanoid then** line out loud.
3. Say in your own words what **if / else** means.

Write what you will say in your video. You can read from it while filming.
