

RB001 Week 7 — English Worksheet

Topic: Build Week — Your Full Obby · **Course:** Obby Architect · **Time:** about 45 minutes

No new syntax this week. You already know everything you need: parts, colors, lava, doors, loops, vanishing bridges, coins, and the leaderboard. This week you put it **all together** into one full obby with a start, checkpoints, and a win pad.

1 · Predict 🧠

Read each script. These mix ideas from past weeks. Write what you think will happen.

```
local winPad = script.Parent

winPad.Touched:Connect(function(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        print("You win!")
        for i = 1, 6 do
            winPad.Color = Color3.fromRGB(255, 215, 0)
            task.wait(0.2)
            winPad.Color = Color3.fromRGB(85, 255, 127)
            task.wait(0.2)
        end
    end
end)
```

A player jumps onto the win pad. What prints in the Output? What does the pad look like, and for about how many seconds?

```

local lava = script.Parent

lava.Touched:Connect(function(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        humanoid.Health = 0
    end
end)

```

A player touches the lava — what happens? A loose part falls onto the lava — what happens then?

```

local platform = script.Parent

while true do
    for i = 1, 10 do
        platform.Transparency = i / 10
        task.wait(0.1)
    end
    platform.CanCollide = false
    task.wait(2)
    platform.Transparency = 0
    platform.CanCollide = true
    task.wait(3)
end

```

This is one platform of your bridge. In each cycle, for how many seconds is it solid and safe? When should a player run across?

2 · Spot the Bug 🐛

Each script below was meant to do something, but it is broken. Read what the script is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The win pad should celebrate only when a **player** touches it. But a loose part rolled onto the pad and the game printed "You win!" with nobody there.

```
local winPad = script.Parent

winPad.Touched:Connect(function(otherPart)
    print("You win!")
    for i = 1, 6 do
        winPad.Color = Color3.fromRGB(255, 215, 0)
        task.wait(0.2)
        winPad.Color = Color3.fromRGB(85, 255, 127)
        task.wait(0.2)
    end
end)
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The lava should only hurt players. But when a coin fell onto the lava, the Output showed a red error and the lava stopped working.

```

local lava = script.Parent

lava.Touched:Connect(function(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    humanoid.Health = 0
end)

```

Hint: a falling coin has no Humanoid, so `humanoid` is `nil`.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The secret door should **open**: turn invisible and let the player walk through. It turns invisible — but the player still bumps into an invisible wall.

```

local door = script.Parent

door.Touched:Connect(function(otherPart)
    local humanoid = otherPart.Parent:FindFirstChildWhichIsA("Humanoid")
    if humanoid then
        door.Transparency = 1
    end
end)

```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Plan first, then build. List your obby sections in order, **easy** → **hard**. Write where the checkpoints (SpawnLocation parts) go, and where you will put lava, doors, vanishing bridges, and coins.

Now build your full obby in Roblox Studio: a start, at least 3 sections, at least 1 checkpoint, coins, and a win pad at the end. Beat it yourself in Play mode. When you finish, come back here.

Send a photo or video of your finished obby, then explain what you built. Use these sentence starters — write 4 to 6 sentences total.

My obby has ... sections, in this order: ...

The easiest section is ... and the hardest is ...

I put a checkpoint at ... because ...

One tricky moment was when ...

To fix it, I ...

If I had more time, I would ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you **playtest** your full obby from start to finish. Talk through it like you are teaching someone who has never seen it. Try to use these words: **section, checkpoint, playtest, humanoid, win.**

1. Start at the spawn and play through every section — show that each one **can be beaten**.
2. Fall on purpose once and show that the checkpoint works — you respawn there, not at the start.
3. Collect a coin and show the leaderboard go up.
4. Touch the win pad and read your win-pad script out loud — say what the `if humanoid` `then` check stops.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
