

RB002 Week 3 — English Worksheet

Topic: Press E to Talk — ProximityPrompt · **Course:** Story Quest · **Time:** about 45 minutes

This week your NPCs come alive. A **ProximityPrompt** shows "Press E" when a player walks close, and the **Triggered** event runs your code when they press it.

1 · Predict 🧙

Read each script. Before you imagine running it in Roblox Studio, write what you think will happen.

```
local prompt = Instance.new("ProximityPrompt")
prompt.ActionText = "Talk"
prompt.ObjectText = "Old Wizard"
prompt.Parent = script.Parent
```

You walk close to the part. What words show on your screen?

```
local prompt = script.Parent.ProximityPrompt

prompt.Triggered:Connect(function(player)
    print("Hello, " .. player.Name)
end)
```

When does the print happen — when you walk near, or when you press E?

```
local prompt = script.Parent.ProximityPrompt
local talkCount = 0

prompt.Triggered:Connect(function(player)
    talkCount = talkCount + 1
    print("You talked " .. talkCount .. " times")
end)
```

You press E three times. What does the Output window say after the last press?

2 · Spot the Bug 🐛

Each script below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The wizard should say hello when the player **presses E**. Right now Studio shows an error, because a ProximityPrompt has no **Touched** event.

```
local prompt = script.Parent.ProximityPrompt

prompt.Touched:Connect(function(player)
    print("Hello, " .. player.Name)
end)
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The prompt should show on the wizard part. Right now no "Press E" ever appears in the game.

```
local prompt = Instance.new("ProximityPrompt")
prompt.ActionText = "Talk"
prompt.ObjectText = "Old Wizard"
```

Hint: the prompt was made, but it was never put anywhere.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The screen should show the name **Old Wizard** on top and the action **Talk** next to the E. Right now the two words are in the wrong places.

```
local prompt = script.Parent.ProximityPrompt
prompt.ActionText = "Old Wizard"
prompt.ObjectText = "Talk"
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your own quest world. Add an NPC with a ProximityPrompt. Give it an `ActionText` and an `ObjectText`, and make `Triggered` print a message. When you finish, come back here.

Send a photo or video of you talking to your NPC, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

My NPC is a ...

When I walk close, the screen shows ...

When I press E, my code ...

I used **Triggered** because ...

One tricky moment was when ...

If I had more time, I would ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you talk to your NPC. Talk through it like you are teaching someone who has never seen it. Try to use these words: **ProximityPrompt**, **Triggered**, **ActionText**, **NPC**, **press E**.

1. Walk close to your NPC and show the prompt on the screen.
2. Press E and show what happens in the Output window.
3. Show your script and read the **Triggered:Connect** line out loud.
4. Say in your own words the difference between **walking near** and **pressing E**.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
