

M001 Week 1 — English Worksheet (Beginner)

Topic: First Hello with the Agent · **Course:** Pyramid Problems · **Level:** Beginner · **Time:** about 30 minutes

1 · Predict 🧠

Read the steps. Circle your answer.

```
move forward
place block down
```

How many blocks does the agent place? Circle one: 0 · 1 · 2

Where does the block land? Circle one: where it started · one step forward · up in the air

```
turn right
move forward
```

Does the agent move the way it started facing? Circle one: yes · no

Why? Circle one: it turned right first · it moved up · it did nothing

2 · Find the Difference 🐛

Clean steps first, then a buggy version. Circle the bug.

Pair A — Should place a block, move forward, then place another block.

```
# clean
place block down
move forward
place block down
```

```
# buggy
place block down
place block down
move forward
```

What is wrong? Circle one: both blocks land in one spot · the agent moves too far · the agent turns right

Pair B — Should turn right **first**, then walk 2 steps.

```
# clean
turn right
move forward
move forward
```

```
# buggy
move forward
move forward
turn right
```

What is wrong? Circle one: it turns at the end, not the start · it walks 3 steps · it never moves

3 · Fill the Gap

Place 2 blocks **side by side**. Fill the missing line.

```
place block down
```

```
_____
```

```
place block down
```

Missing line? Circle one: move forward · move up by 1 · turn right

4 · Show Your Work 📷 🎥

Now switch to your homework world. Build a **4-block straight path** by moving and placing one block at a time. When you finish, come back here.

Record **one video** (a phone is fine). Show two things:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

Write your lines here, then say them in your video.
