

M004 Week 6 — English Worksheet (Beginner)

Topic: A Space that Reacts — Event → Check → Action · **Course:** Functions & Games · **Level:** Beginner
· **Time:** about 30 minutes

This week your world **reacts to the player**: an **event** happens → the code **checks** something → an **action** runs.

1 · Predict

```
on player walks on gold block:  
  say "Welcome to my world!"
```

The player walks on grass. Does the message appear? Circle one: yes · no

Why? Circle one: grass is not gold · grass is gold

```
on player walks on red carpet:  
  replace block below with air  
  say "You fell in my trap!"
```

The player steps on red carpet. Does the trap fire? Circle one: yes · no

2 · Find the Difference 🐉

Pair A — The secret message should appear **only** on the gold block.

```
# clean
on player walks on gold block:
    say "You found the secret room!"
```

```
# buggy
on player walks:
    say "You found the secret room!"
```

What is wrong? Circle one: fires on every block · fires only on gold

Pair B — The trap should fire on **red** carpet, not the safe blue path.

```
# clean
on player walks on red carpet:
    spring_trap()
```

```
# buggy
on player walks on blue carpet:
    spring_trap()
```

What is wrong? Circle one: wrong carpet, blue not red · wrong message

3 · Fill the Gap

One word is missing.

```
on player walks on ____ block:  
  say "You found the secret room!"
```

Fill the gap. Circle one: gold · say · walk

4 · Show Your Work 📷 🎥

Now switch to your homework world. Build one spot that reacts when the player walks on it. When you finish, come back here.

Record **one video** (a phone is fine). Show two things:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

Write your lines here, then say them in your video.
