

M000 Week 1 — English Worksheet

Topic: Agent Movement · **Course:** Builder Basics · **Time:** about 45 minutes

1 · Predict 🧠

Read each set of steps. Write what you think will happen.

```
move forward
move forward
move forward
```

Where does the agent end up? Write one sentence.

```
move forward
turn right
move forward
turn right
move forward
turn right
move forward
turn right
```

What shape did the agent trace on the ground?

```
move forward
move up by 3
move forward
```

Is the agent higher, lower, or the same height as where it started?

2 · Spot the Bug 🐛

Each code block is broken. Read what it should do, rewrite it, then explain why the original was wrong.

Bug A — The agent is supposed to walk **5 steps forward**.

```
move forward  
move forward  
move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The agent is supposed to walk forward, then turn right, then walk forward again.

```
move forward  
move forward  
turn right
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The agent is supposed to go forward 2 steps, then up 2 steps.

```
move forward
move up by 2
move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Show Your Work 📷 🎥

Switch to your homework world. Move your agent in an **L-shape** path — go forward, turn, then go forward again (no loops this week).

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

The most fun part was _____.

Something new I learned was _____.

Write your lines here, then say them in your video.
