

▲ M001 Week 5 — English Worksheet (Beginner)

Topic: First Pyramid · **Course:** Pyramid Problems · **Level:** Beginner · **Time:** about 30 minutes

The agent walks around a **square** and drops blocks as it walks. Stack squares that get **smaller** and you get a pyramid.

1 · Predict 🧠

Read the steps. Before you imagine the agent doing it, circle or write your answer.

```
set f to 4
place on move ON
repeat 4 times:
  move forward by f
  turn left
```

What shape does the agent draw? Circle one: line · square · circle

How many sides does it draw? Circle one: 1 · 3 · 4

```
set f to 5
repeat 3 times:
  [draw one square]
  move up by 1
  change f by -2
```

The sides go 5, then ..., then ... Circle one: 5 · 3 · 1 → 5 · 4 · 3

Which square is biggest — bottom or top?

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The agent must draw a closed **square**.

```
# clean
place on move ON
repeat 4 times:
    move forward by f
    turn left
```

```
# buggy
place on move ON
repeat 4 times:
    move forward by f
```

What is wrong? What shape does the buggy code draw instead?

Pair B — Each new layer should be **2 smaller** than the one below.

```
# clean
[draw one square]
move up by 1
change f by -2
```

```
# buggy
[draw one square]
move up by 1
change f by 2
```

What is wrong? Does the buggy tower get smaller or bigger as it goes up?

3 · Fill the Gap

Each square must sit one block **higher** than the last. One line is missing. Fill it in using the word bank.

```
set f to 5
repeat 3 times:
  [draw one square]
  _____
  change f by -2
```

Word bank: move up by 1 · move down by 1 · turn left

Write the missing line:

4 · Tell Me What You Built 📷

Now switch to your homework world. Run your `pyra` command to build a pyramid. If the agent gets stuck or faces the wrong way, use your helper commands — `1` turns it left, `r` turns it right, `r1` brings it back to you.

Send a photo or video of your pyramid, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

The bottom square has sides ... blocks long.

Each new layer gets smaller by ...

The hardest part was ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) and walk the camera around your pyramid. Talk like you are teaching a friend. Try to use these words: **square, side, layer, shrink**.

1. Walk around the pyramid and show all 4 sides.
2. Say the side length of each layer from bottom to top.
3. Show one bug you hit and how you fixed it.

Write what you will say in your video. You can read from it while filming.
