

RB004 Week 4 — English Worksheet (Beginner)

Topic: RemoteEvents — Arena Announcements · **Course:** Arena Legends · **Level:** Beginner · **Time:** about 30 minutes

This week the server learns to talk to players. A **RemoteEvent** is like a megaphone: the server **shouts** with `FireAllClients`, and every player's screen **listens** with `OnClientEvent`.

1 · Predict 🧠

Read the script. Before you imagine running it in Studio, circle or write your answer.

```
-- Script in ServerScriptService
local announceEvent = game.ReplicatedStorage.AnnounceEvent

announceEvent:FireAllClients("Round started!")
```

You test with 2 Players. Do BOTH players receive the message "Round started!"? Circle one: yes
· no

Why?

```
-- LocalScript inside the TextLabel
announceEvent.OnClientEvent:Connect(function(message)
    label.Text = message
end)
```

The server fires "Round started!". Does the label now show "Round started!"? Circle one: yes · no

2 · Find the Difference 🦎

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The player's screen listens with `OnClientEvent`, not `OnServerEvent`.

```
-- clean: LocalScript inside the TextLabel
announceEvent.OnClientEvent:Connect(function(message)
    label.Text = message
end)
```

```
-- buggy: LocalScript inside the TextLabel
announceEvent.OnServerEvent:Connect(function(message)
    label.Text = message
end)
```

What is wrong? Whose ear is `OnServerEvent` ?

Pair B — To shout to **everyone**, the server uses `FireAllClients`.

```
-- clean
announceEvent:FireAllClients("Round started!")
```

```
-- buggy
announceEvent:FireClient("Round started!")
```

What is wrong?

3 · Fill the Gap

The player's screen should **listen** for the server's message. One word is missing. Fill it in using the word bank.

```
announceEvent.____:Connect(function(message)
    label.Text = message
end)
```

Word bank: OnClientEvent · OnServerEvent · Changed

Write the missing word:

4 · Tell Me What You Built 📷

Now open your own arena game. Add a RemoteEvent named **AnnounceEvent** in ReplicatedStorage, make the server shout "Round started!", and show it on a TextLabel. Test with **Test tab** → **2 Players**. When you finish, come back here.

Send a photo or video of the announcement on both players' screens, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

The server shouts with **FireAllClients** when ...

When I tested with 2 Players, I saw ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you test with 2 Players. Talk like you are teaching a friend. Try to use these words: **RemoteEvent, shout, listen.**

1. Show the RemoteEvent in ReplicatedStorage, then press Test → 2 Players.
2. Show the announcement appearing on both screens.
3. Say in your own words who shouts and who listens.

Write what you will say in your video. You can read from it while filming.
