

RB005 Week 2 — English Worksheet

Topic: Greybox It — Find the Fun First · **Course:** Dream Game Studio · **Time:** about 45 minutes

This week you build your WHOLE map with plain gray parts. No colors, no decorations, no fancy models. This is called **greyboxing** — it lets you find the fun fast, before you spend hours making things pretty.

1 · Predict

Read each situation. Write what you think before class.

A student spends the whole first week decorating a beautiful start area. In week 3 they finally playtest — and the game is boring. What went wrong with their order of work?

Your greybox map is ugly, but you can already play it from start to goal in 2 minutes. Why is this MORE useful right now than a beautiful map you cannot play yet?

During a playtest you find a jump that is too easy, so a whole section is boring. Your parts are plain gray boxes. How hard is it to move them around? What if that section were already fully decorated?

2 · Spot the Problem 🐉

Each layout plan below is broken. Read what the plan is **supposed** to do, then explain what is wrong and how you would fix it.

Plan A — The player should play from start to finish.

```
START platform → big open field → ???
```

The player spawns, runs around the field ... and then what? What is missing? Where would you put it?

Plan B — The game should take a few minutes and feel like a challenge.

```
START platform → GOAL flag (3 steps away)
```

A player wins in 3 seconds without doing anything. What is missing in the middle? What would you add?

Now sketch YOUR layout below. Mark the START, the GOAL, and draw the path the player takes between them.

3 · Tell Me What You Built 📷

Now open Roblox Studio and greybox your **WHOLE** layout from your week 1 design — start, path, goal — all in plain gray parts. Then playtest it for 10 minutes. When you finish, come back here.

Send a photo or video of your greybox map, then explain what you found. Use these sentence starters — write 4 to 6 sentences total.

My greybox map has ...

The player starts at ... and wins by ...

In my playtest, the fun part was ...

The boring part was ...

After playtesting, I changed ... because ...

Before I decorate, I still want to fix ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you walk through your greybox map in Studio. Narrate the player's path like a tour guide. Try to use these words: **greybox**, **layout**, **start**, **goal**, **playtest**.

1. Start at the spawn and walk the path a player would take.
2. Point at the goal and say the win condition.
3. Show the most fun part and say why it is fun.
4. Show one thing you changed after your playtest.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
