

## RB005 Week 8 — English Worksheet

**Topic:** Launch & Showcase — Publish and Present · **Course:** Dream Game Studio · **Time:** about 45 minutes

This is it — **launch week**. You publish your game as **Public** and present it like a real game studio: what the game is, your hardest bug story, your favorite script read out loud, and what you would build next.

### 1 · Predict 🧠

Read each situation. Before it happens for real, write what you think will happen.

You publish your game and set it to **Public**. Your classmate searches its title on Roblox from their own house.

**What can your classmate do now that they could not do yesterday? What can they NOT do (hint: they cannot open your scripts)?**

|  |
|--|
|  |
|  |
|  |
|  |

Your game is Public, but you only ever tested it **alone in Studio**. A stranger joins and clicks Play.

**Predict one thing that might go wrong for the stranger that never went wrong for you. How would you find out about it?**

|  |
|--|
|  |
|  |
|  |
|  |

```
local door = script.Parent

door.Touched:Connect(function(hit)
    local player = game.Players:GetPlayerFromCharacter(hit.Parent)
    if player and player.leaderstats.Coins.Value >= 5 then
        door.CanCollide = false
        door.Transparency = 0.7
    end
end)
```

**In your showcase you read a script like this out loud. Practice now: what does this script do, in one or two sentences a non-coder could understand?**

|  |
|--|
|  |
|  |
|  |
|  |

## 2 · Spot the Bug 🐛

Launch-day bugs! Read what each one is **supposed** to be, write your fix, then explain why the original was wrong and why your fix works.

**Bug A** — Everyone should be able to find and play the game. You told the whole class it is live, but nobody can join.

In Game Settings → Permissions, the game is still set to **Private**.

**Write the fix (what setting do you change, and to what):**

|  |
|--|
|  |
|  |
|  |
|  |

**Why was it wrong? Why does your fix work?**

|  |
|--|
|  |
|  |
|  |
|  |

**Bug B** — Players should start with **0 coins** and earn them by playing. But this test script from week 6 is still in `ServerScriptService`, so everyone wins instantly.

```
-- TEST: remove before launch!
game.Players.PlayerAdded:Connect(function(player)
    local leaderstats = player:WaitForChild("leaderstats")
    leaderstats.Coins.Value = 999
end)
```

**Write the fix:**

|  |
|--|
|  |
|  |
|  |
|  |

**Why was it wrong? Why does your fix work?**

|  |
|--|
|  |
|  |
|  |
|  |

**Bug C** — A showcase presentation should be interesting for the audience. This is a classmate's whole plan:

*"Hi. This is my game. I show the game now. ... OK that's all. The end."*

**Write a fixed plan (list at least 4 things the presentation should include — think: what the game is, the hardest bug story, a script read aloud, what comes next):**

|  |
|--|
|  |
|  |
|  |
|  |

**Why was it wrong? Why does your fix work?**

|  |
|--|
|  |
|  |
|  |
|  |

### 3 · Tell Me What You Built 📷

Publish your game as **Public**, then plan your showcase here. Send a photo or video of your live game page, and write your presentation plan. Use these sentence starters — write 4 to 6 sentences total.

My game is called ... and it is a game where ...

The hardest bug I ever had was ... and I fixed it by ...

My favorite script is the one that ... because ...

In Roblox 1 week 1, I could not ... but this week I ...

The next thing I would build is ...

The best moment of these 5 courses was ...

---

## 4 · Record Your Walkthrough 🎥

This week your video **IS** the presentation. Take a video on your phone (or a parent's phone) and present your game from start to finish, like you are on stage at a game studio. Try to use these words: **publish, public, bug, script, update**.

1. Say your game's name and what kind of game it is. Show the title screen.
2. Play your game on camera and show the core mechanic.
3. Tell your hardest bug story — what happened, and how you fixed it.
4. Open your favorite script and read it out loud. Explain it in simple words.
5. Finish with what you would build next if the studio kept going.

**Write what you will say in your video.** Use the space below to plan it before you record — you can read from it while filming.
