

M002 Extension 1 — Redstone Trail Solver

Topic: Redstone Trail Solver (3D Cube Maze) · **Course:** Maze Madness · **Level:** Extension (Intermediate) · **Time:** about 45 minutes

The agent solves a **3D cube maze** on its own. It reads a **redstone trail** above, below, left, right and ahead, then picks a move. You drive it with chat: **l** turns left, **r** turns right, **run** starts it, **rl** brings it back.

1 · Read the Chat Commands

A chat word binds to an action. Type the word, the agent runs the code.

```
def turn_left():
    agent.turn(LEFT_TURN)
player.on_chat("l", turn_left)
```

You type **l**. What does the agent do?

```
def go_back():
    agent.teleport_to_player()
player.on_chat("rl", go_back)
```

You type **rl**. Where does the agent go? When is that handy?

2 · Trace the Solver 🔍

This loop runs when you type `run`.

```
while True:
    agent.move(FORWARD, 1)
    if agent.detect(REDSTONE, DOWN):
        agent.move(UP, 1)
    elif agent.detect(REDSTONE, UP):
        agent.move(DOWN, 4)
```

`while True` keeps going. The maze is 3D. Which line moves the agent up a floor?

Which line moves it down? How far?

In one short sentence: what does `detect(REDSTONE, DOWN)` tell the agent?

3 · Fill the Blanks

The agent should step forward, then go **up** when there is redstone **below** it. Fill the blanks.

```
agent.move(_____, 1)
if agent.detect(REDSTONE, _____):
    agent.move(_____, 1)
```

Word bank: FORWARD · DOWN · UP

4 · Spot the Bug 🐛

This should **keep going** and check the trail on every step.

```
agent.move(FORWARD, 1)
if agent.detect(REDSTONE, DOWN):
    agent.move(UP, 1)
```

Hint: it only checks once. What wraps a block so it repeats?

Write the fix:

One line: why was it wrong?

5 · Finish + Film 📷 🎥

Open the world. Type **run** . Let the agent reach the goal.

Send a photo OR video of the agent at the goal. Write 3 or 4 sentences.

The maze was 3D, so the agent had to ...

The redstone trail told the agent to ...

I used **detect** to ...

The hardest part was ...

Phone video plan. Film the agent solving the maze. Talk like you teach a friend. Try these words:
detect, redstone, trail, loop, 3D.

1. Show the maze and the redstone trail.
2. Type **run** and show the agent following it.
3. Say one spot where the agent went up or down.

Write what you will say:
