

M002 Extension 4 — Complete the Maze

Topic: Add Two AND Conditions · **Course:** Maze Madness · **Level:** Extension (Beginner) · **Time:** about 30 minutes

The agent knows **four rules** to follow redstone. But it gets **stuck** at two spots. There, two signals are on at once. You find the two signals and add your own **AND** rule.

1 · The Four Rules

Each rule sees **one** signal and does **one** thing.

```
if redstone on the LEFT:  
    turn RIGHT  
if redstone on the RIGHT:  
    turn LEFT  
if redstone BELOW:  
    move UP  
if redstone ABOVE:  
    move DOWN
```

Draw a line to match. You will reuse these.

Signal		Action
redstone left	→	move up
redstone below	→	turn right
redstone above	→	turn left
redstone right	→	move down

2 · AND means BOTH

AND is true only when **both** are true.

```
if redstone LEFT AND redstone BELOW:  
    turn right  
    move up
```

Left on, but NOT below. Is the AND true? yes · no

Left on AND below on. Is the AND true? yes · no

An AND with two signals needs how many actions?

3 · Look at the Stuck Spots 🔍

Open the **M002 Complete the Maze** world. Type **run** . The agent stops at **two** spots. Walk to each one and look around the agent.

Tick the signals you see.

	left	right	below	above
Stuck spot 1				
Stuck spot 2				

4 · Write Your Two AND Rules

Use the signals you ticked and the actions from section 1.

Stuck spot 1 — fill the blanks:

if redstone _____ AND redstone _____:

Stuck spot 2 — write the whole rule:

5 · Finish the Whole Maze 📷

Type **run**. The goal is to reach the **very end**. If it sticks, fix your AND rules and run again.

Send a photo or video of the agent at the goal. Then write 2 or 3 sentences with these starters.

The agent knew four rules, like ...

The two signals at the first stuck spot were ... and ...

An AND rule needs ...
