

M000 Week 3 — English Worksheet

Topic: Bridge Building · **Course:** Builder Basics · **Time:** about 45 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
repeat 5 times:
  place block down
  move forward
```

What does the agent build? Write one sentence.

```
repeat 3 times:
  place block down
  move forward
turn right
repeat 3 times:
  place block down
  move forward
```

What shape does the agent leave on the ground?

```
repeat 7 times:
  place block down
  move forward
```

If the gap below the agent is 7 blocks wide, does the bridge reach the other side? Explain.

2 · Spot the Bug 🐛

Each block of code below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The agent is supposed to build a **5-block-long bridge** by repeating "place block, move forward".

```
place block down
move forward
place block down
move forward
place block down
move forward
```

Write the fixed code using a loop:

Why was the original wrong? Why does your fix work?

Bug B — The agent is supposed to build a bridge that is exactly **6 blocks long**.

```
repeat 5 times:
  place block down
  move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The agent is supposed to lay 4 blocks in a line. The blocks should be next to each other, not on top of each other.

```
repeat 4 times:
  place block down
  move up by 1
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your homework world. Build a **15-block bridge** across the river or cliff. When you finish, come back here.

Send a photo or video of your bridge, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

First, I ...

I used a loop to ...

The bridge is ... blocks long.

The hardest part was ...

To fix it, I ...

If I had more time, I would ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you walk the camera across the bridge. Talk through it like you are teaching someone who has never seen it. Try to use these words: **loop**, **repeat**, **place**, **block**, **bridge**.

1. Show one end of the bridge and walk across it.
2. Read your loop out loud and say what it does.
3. Show one bug you hit and how you fixed it.
4. Say how many blocks long your bridge is.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
