

M003 Extension — English Worksheet (Intermediate)

Topic: Pixel-Art Snow Golem (x, y) · **Course:** 3D Coordinates · **Level:** Intermediate (Extension, after Week 3) · **Time:** about 40 minutes

A bonus picture challenge: build a whole **snow golem** — snow body, carved-pumpkin head, coal buttons, stick arms — onto your wall. Every block sits at **(x, y)** — x is how far **across**, y is how far **up**.

Build your canvas. Run this to make a blank **15 × 15** wall, then put a **red block at your feet** as your **home spot**:

Blocks

Python

```
def on_run():
    blocks.fill(WHITE_CONCRETE,
                pos(1, 1, 0),
                pos(15, 15, 0),
                FillOperation.REPLACE)
    player.on_chat("run", on_run)
```

● **Big idea:** (x, y) is counted from your **home spot**, not the world's corner. Stand on the red block *every* time you run, or the whole picture shifts.

1 · Predict

Read each set of steps. Write a sentence about what you will see.

```
place pumpkin block at (6, 15)
place pumpkin block at (7, 15)
place pumpkin block at (8, 15)
```

Three pumpkin blocks share $y = 15$. What shape do they make, and which number stays the same?

```
place black block at (8, 3)
place black block at (8, 5)
place black block at (8, 7)
```

These three coal buttons share $x = 8$. What shape do they make, and which number changes?

```
place snow block at (8, 7)
place black block at (8, 7)
```

Two blocks aim for the same (x, y) . What do you see — snow, black, or both? Why?

2 · Spot the Bug 🐛

Each code block is broken. Read what it should do, fix it, then explain why the original was wrong and your fix works.

Bug A — This should make the golem's two eyes, one at (7, 13) and one at (9, 13). Both land in the **same spot**.

```
place black block at (7, 13)
place black block at (7, 13)
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — A coal button should sit at (8, 7). The two numbers are **swapped**, so it lands in the wrong place.

```
place black block at (7, 8)
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Show Your Work 📷 🎥

Stand on your **home spot** (the red block). Build the 🧊 snow golem block by block, reading each colored square's (x, y) — **x** across the top, **y** down the side.

🧊 **Snow Golem** (snow · light blue #cfe0ec, pumpkin · #e5772b, face + coal buttons · black, arms · brown #6b4a2b)

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

The most fun part was _____.

Something new I learned was _____.

Write your lines here, then say them in your video.
