

M003 Week 6 — English Worksheet (Beginner)

Topic: Building Solid Shapes with the Builder · **Course:** 3D Coordinates · **Level:** Beginner · **Time:** about 30 minutes

This week you use the **builder** — an invisible helper that moves through the world. The pattern: move the builder to the start, **place a mark**, move along x, y, or z, then **fill** between the mark and the builder.

1 · Predict

Read the steps. Before you imagine it happening, circle one: yes · no

```
move builder to (0, 0, 0)
place mark
move builder along x by 5
fill from mark with stone
```

Does this build a line of stone? Circle one: yes · no

Why?

```
move builder to (0, 0, 0)
move builder along x by 5
fill from mark with stone
```

The builder never placed a mark. Does **fill build the line? Circle one:** yes · no

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The mark must go down **before** the builder moves.

```
# clean
move builder to (0, 0, 0)
place mark
move builder along x by 5
fill from mark with stone
```

```
# buggy
move builder to (0, 0, 0)
move builder along x by 5
place mark
fill from mark with stone
```

What is wrong? Why does the buggy one make only one block?

Pair B — The builder must go to the start corner **first**.

```
# clean
move builder to (0, 0, 0)
place mark
move builder along x by 6
trace wall with stone
```

```
# buggy
place mark
move builder along x by 6
trace wall with stone
move builder to (0, 0, 0)
```

What is wrong?

3 · Fill the Gap

The builder needs a start point before it moves. One word is missing. Fill it in using the word bank.

```
move builder to (0, 0, 0)
place ____
move builder along x by 5
fill from mark with stone
```

Word bank: mark · block · wall

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your homework world. Use the builder to make a **stone wall**: move to a start corner, place a mark, move along x and then up along y, then fill. When you finish, come back here.

Send a photo or video of your wall, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

I moved the builder to ...

I placed the mark before ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you show your wall in the world. Talk like you are teaching a friend. Try to use these words: **builder**, **mark**, **fill**, **axis**.

1. Show the empty spot, then run your code so the wall appears.
2. Point at the corner where the mark went down.
3. Say in your own words why the mark comes **before** moving.

Write what you will say in your video. You can read from it while filming.
