

M004 Week 4 — English Worksheet (Beginner)

Topic: Player Events · **Course:** Functions & Games · **Level:** Beginner · **Time:** about 30 minutes

This week your code reacts to **you**, the player. An **event** like `on player walk:` runs by itself when the player does something — perfect for traps and rewards.

1 · Predict 🧠

Read the steps. Before you imagine it happening, circle or write your answer.

```
on player walk:
  if block below is gold:
    say "Treasure room!"
```

The player walks onto a gold block. Does the message appear? Circle one: yes · no

Why?

```
on player place block:
  say "You built something!"
```

The player only walks around and places nothing. Does the message appear? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The trap should run **by itself** when the player walks, not wait for a chat command.

```
# clean
on player walk:
    if block below is gold:
        say "Trap!"
```

```
# buggy
on chat command "trap":
    if block below is gold:
        say "Trap!"
```

What is wrong? When does the buggy trap run?

Pair B — The message should celebrate **placing a block**, so it needs the right event.

```
# clean
on player place block:
    say "Nice building!"
```

```
# buggy
on player walk:
    say "Nice building!"
```

What is wrong?

3 · Fill the Gap

The message should appear when the player walks onto gold. One word is missing. Fill it in using the word bank.

```
on player ____:  
  if block below is gold:  
    say "Treasure room!"
```

Word bank: walk · gold · say

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your homework world. Build one trap or one reward that fires with `on player walk:`. When you finish, come back here.

Send a photo or video of your trigger firing, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My trigger fires when the player ...

When I stepped on ..., my code ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you walk through your world and set off your trigger. Talk like you are teaching a friend. Try to use these words: **event**, **trigger**, **player**.

1. Show your world, then start walking.
2. Set off your trigger and read its event line out loud.
3. Say in your own words what an **event** is.

Write what you will say in your video. You can read from it while filming.
