

M004 Week 5 — English Worksheet (Beginner)

Topic: Your Function Library — Reusable Building Blocks · **Course:** Functions & Games · **Level:** Beginner · **Time:** about 30 minutes

This week you collect your best functions into a **library** — reusable building blocks like `build_wall` and `build_tower`. Big builds become easy when small functions do the work.

1 · Predict 🧠

Read the steps. Before you imagine the build happening, circle or write your answer.

```
function build_wall(length):
    repeat length times:
        place stone block
        move forward 1

build_wall(3)
```

Does this build a wall 3 blocks long? Circle one: yes · no

Why?

```
function build_tower(height):
    repeat height times:
        place stone block
        move up 1
```

There is no call line at the bottom. Does the tower get built? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The library should have **two different** functions with two different names.

```
# clean
function build_wall(length):
    place stone blocks

function build_glass_wall(length):
    place glass blocks
```

```
# buggy
function build_wall(length):
    place stone blocks

function build_wall(length):
    place glass blocks
```

What is wrong? Why does the computer get confused?

Pair B — The tower should be **as tall as the number you give it**.

```
# clean
function build_tower(height):
    repeat height times:
        place stone block
        move up 1
```

```
# buggy
function build_tower(height):
    repeat 3 times:
        place stone block
        move up 1
```

What is wrong? What happens when you call `build_tower(10)` ?

3 · Fill the Gap

The tower should be as tall as the number you give it. One word is missing. Fill it in using the word bank.

```
function build_tower(height):  
  repeat ____ times:  
    place stone block  
    move up 1
```

Word bank: height · tower · block

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your homework world. Build something using your own functions. When you finish, come back here.

Send a photo or video of your build, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

I made a function called ...

I reused it when ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while your code builds. Talk like you are teaching a friend. Try to use these words: **function**, **call**, **reuse**.

1. Show your functions before you run anything.
2. Read one function name out loud and say what it builds.
3. Say in your own words why reusing a function is better than copying code.

Write what you will say in your video. You can read from it while filming.
