

M000 Week 2 — English Worksheet (Beginner)

Topic: Placing Blocks · **Course:** Builder Basics · **Level:** Beginner · **Time:** about 30 minutes

1 · Predict 🧠

Read the steps. Circle your answer.

```
place block down  
move forward  
place block down
```

How many blocks did the agent place? Circle one: 1 · 2 · 3

Are the blocks next to each other or far apart? Circle one: next to each other · far apart

```
move up by 1  
place block down
```

Where does the block land? Circle one: one block higher · on the ground

2 · Find the Difference 🐛

Clean steps first, then a broken version. Circle the bug.

Pair A — The agent should place a block, then move, then place another block.

```
# clean
place block down
move forward
place block down
```

```
# buggy
place block down
place block down
move forward
```

What is wrong? Circle one: no move between the blocks · a block is missing · a wrong turn

Pair B — The agent should place 2 blocks in a line on the ground.

```
# clean
place block down
move forward
place block down
```

```
# buggy
place block down
move up by 1
place block down
```

What is wrong? Circle one: it moves up, not forward · a block is missing · wrong order

3 · Fill the Gap

The agent should place 3 blocks in a row. One line is missing.

```
place block down  
move forward  
place block down  
_____  
place block down
```

Which line is missing? Circle one: move forward · turn right · move up by 1

4 · Show Your Work 📷 🎥

Now switch to your homework world. Place **3 blocks in a row** on the ground. When you finish, come back here.

Record **one video** (a phone is fine). Show two things:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

Write your lines here, then say them in your video.
