

M000 Week 1 — English Worksheet (Intermediate)

Topic: Agent Movement · **Course:** Builder Basics · **Level:** Intermediate · **Time:** about 38 minutes

1 · Predict 🧠

Read each set of steps. Write what you think will happen.

```
move forward  
move forward  
move forward
```

Where does the agent end up? Write one sentence.

```
move forward  
turn right  
move forward
```

Does the agent walk in a straight line? Write one sentence to explain why or why not.

```
move forward  
move up by 3  
move forward
```

Is the agent higher, lower, or the same height as where it started? Explain how you know.

2 · Spot the Bug 🐛

Each code block is broken. Find the bug and write one or two sentences about what is wrong.

Bug A — Goal: the agent should walk **4 steps forward**.

```
move forward
move forward
move forward
```

What is wrong?

Bug B — Goal: the agent should walk forward, **then** turn right.

```
turn right
move forward
```

What is wrong?

Bug C — Goal: the agent should go forward 2 steps, then go **up** 2 blocks.

```
move forward
move forward
move forward
```

What is wrong? What line should change?

3 · Fix the Code

Goal: the agent should walk **forward 2 steps, turn right**, then **forward 1 step**. The code below does not match.

```
move forward
turn right
turn right
move forward
```

Write the fixed code:

Explain in one sentence why your version matches the goal.

4 · Show Your Work 📷 🎥

Switch to your homework world. Move your agent in an **L-shape** path — go forward, turn once, then go forward again (no loops this week).

Record **one video** (a phone is fine). Show two things:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

Write your lines here, then say them in your video.
