

M004 Week 3 — English Worksheet (Beginner)

Topic: Sensing the World · **Course:** Functions & Games · **Level:** Beginner · **Time:** about 30 minutes

This week your agent **senses** the world before it acts. It can detect a block **ahead** and check what is **below**.

1 · Predict 🧠

```
if agent detects block ahead:
    turn left
otherwise:
    move forward
```

A wall is right in front of the agent. Does it turn left? Circle one: yes · no

Why? Circle one: it detects the block ahead · the path is open

```
if block below is lava:
    place block below
move forward
```

The agent is standing over lava. Does it place a safe block before moving? Circle one: yes · no

2 · Find the Difference 🐉

Pair A — The lava is **below** the agent, so the check should look below.

```
# clean
if block below is lava:
    place block below
```

```
# buggy
if agent detects block ahead:
    place block below
```

What is wrong? Circle one: looks ahead not below · looks below not ahead

Pair B — On safe ground the agent should still **move**. It needs an **otherwise** .

```
# clean
if block below is lava:
    place block below
otherwise:
    move forward
```

```
# buggy
if block below is lava:
    place block below
```

What is wrong? Circle one: no **otherwise** to move · no **if** check

3 · Fill the Gap

One word is missing.

```
if block ____ is lava:  
    place block below  
otherwise:  
    move forward
```

Fill the gap. Circle one: below · ahead · repeat

4 · Show Your Work 📷 🎥

Switch to your homework world. Send your agent across the danger field using an `if block below is ...` check.

Record **one video** (a phone is fine). Show two things:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.
