

M004 Week 8 — English Worksheet (Beginner)

Topic: Final — Your Minigame / Dungeon · **Course:** Functions & Games · **Level:** Beginner · **Time:** about 30 minutes

This is your **final week** — no new ideas. You combine what you know — functions, chat commands, sensing, events — into a playable **minigame or dungeon**.

1 · Predict

```
on chat command "start":  
    teleport player to room 1  
    say "Find the gold block!"
```

A friend types **start** . Does the game begin? Circle one: yes · no

Why? Circle one: the **start** command runs · nothing is typed

```
on player walks on gold block:  
    say "You win!"  
    give player 1 diamond
```

The player walks on grass. Do they win? Circle one: yes · no

2 · Find the Difference 🐉

Pair A — The trap should fire **only on red carpet**, not at spawn.

```
# clean
on player walks on red carpet:
    spring_trap()
```

```
# buggy
on player walks:
    spring_trap()
```

What is wrong? Circle one: trap fires on every step · trap fires only on red carpet

Pair B — The gold block is the **goal**, the red carpet is the **trap**.

```
# clean
on player walks on gold block:
    say "You win!"
```

```
# buggy
on player walks on red carpet:
    say "You win!"
```

What is wrong? Circle one: wins on the trap carpet · wins on the gold block

3 · Fill the Gap

One word is missing.

```
on player walks on ____ block:  
  say "You win!"  
  give player 1 diamond
```

Fill the gap. Circle one: gold · trap · start

4 · Show Your Work 📷 🎥

Switch to your homework world and build your own minigame or dungeon. Pick a goal, one trap, and one reward, then play it.

Record **one video** (a phone is fine). Show two things:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built ____.

I built it using this code: ____.

In this code I used ____.

The hardest part was ____.

That part was hard because ____.
