

## M002 Week 8 — Final Cube Maze

**Topic:** Final Cube Maze · **Course:** Maze Madness · **Level:** Beginner · **Time:** about 25 minutes

Last week! Build a cube maze. Code the agent to solve it.

### 1 · Plan 🧠

Your maze needs:

- walls
- 1 door
- 1 lever
- start and finish

**Where is the lever? Say it out loud.**

---

## 2 · Circle 🧠

```
keep going until at goal:  
  if wall ahead:  
    turn right  
  else if lever ahead:  
    interact  
  else:  
    move forward
```

**Agent sees a lever. Circle one:** turn right · interact · move forward

---

### 3 · Fill One Blank

```
keep going until _____:
  if wall ahead:
    turn right
  else:
    move forward
```

**Which fills the blank? Circle one:** at goal · forever

---

## 4 · Show Your Work 📷 🎥

Build your final maze:

- **20 × 20 × 20** cube
- 1 door
- 1 lever
- start and finish
- code that solves it

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

**1 · Your code.** Scroll through it. Say what each part does.

**2 · Your build.** Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built \_\_\_\_\_.

I built it using this code: \_\_\_\_\_.

In this code I used \_\_\_\_\_.

The hardest part was \_\_\_\_\_.

That part was hard because \_\_\_\_\_.

The most fun part was \_\_\_\_\_.

Something new I learned was \_\_\_\_\_.
