

M003 Week 3 — English Worksheet (Beginner)

Topic: Pixel Art on the Wall (x, y) · **Course:** 3D Coordinates · **Level:** Beginner · **Time:** about 30 minutes

This week you copy a picture made of blocks onto your wall. Every block sits at a spot named by **two numbers** — (x, y). x is how far **across**. y is how far **up**.

First, build your canvas. Run this to make a blank 15 × 15 wall, then put a **red block at your feet** as your **home spot**:

Blocks

Python

```
def on_run():
    blocks.fill(WHITE_CONCRETE,
                pos(1, 1, 0),
                pos(15, 15, 0),
                FillOperation.REPLACE)
    player.on_chat("run", on_run)
```

● **Stand on the red block every time you run.** If you move, the picture moves too. Same spot every time = a clean picture.

1 · Predict 🧙

Read the steps. Do not run them. Circle one word, then answer.

```
place red block at (6, 1)
place red block at (7, 1)
place red block at (8, 1)
```

Across or up? Circle one: across · up

Which number changes — x or y?

place green block at (8, 13)
place green block at (8, 14)

Across or up? Circle one: across · up

Which number changes — x or y?

2 · Spot the Bug 🐛

This should make a row going **across**: (6, 1), (7, 1), (8, 1). But all three blocks land in the **same spot**.

```
place yellow block at (6, 1)
place yellow block at (6, 1)
place yellow block at (6, 1)
```

Hint: to go across, the **x** must grow. Fill in the blanks.

```
place yellow block at (6, 1)
place yellow block at (__ , 1)
place yellow block at (__ , 1)
```

Write the two missing numbers:

Why was it broken? Write one short sentence.

3 · Build It

Stand on your **home spot** (the red block).

Warm up first. Copy this small green cross. Read each green square's (x, y) and place a green block there.

 Green cross

	1	2	3	4	5
5					
4					
3					
2					
1					

Now try a big one. Pick the 🍍 pineapple or the 🍏 apple from the main worksheet grid and copy it the same way. Read each colored square and place that color at its (x, y).

When you finish, send a photo. Then write 2 sentences with these starters:

I built the ...

The lowest block is at $(x = \dots, y = \dots)$.

4 · Explain It

Take a video on your phone. Show your picture and talk like you are teaching a friend.

1. Show your home spot (the red block).
2. Show your finished picture.
3. Point at one block and say "this one is at x ..., y ...".

Try to use these words: **x · y · across · up · home spot.**

Write 2 short sentences to say in your video.
