

M003 Week 6 — English Worksheet (Beginner)

Topic: Recreate the Ender Dragon (x, y, z) · **Course:** 3D Coordinates · **Level:** Beginner · **Time:** about 30 minutes

A big blocky **ender dragon** is in your world. It is black with purple eyes. The body is one long box. The head is a block at the front. Today you build a **small** dragon: a short body and a head. Every block needs **three** numbers — **(x, y, z)**. x is **across**, y is **up**, z is **forward** (deep).

● Stand on your **home spot** (red block) every run. Move your feet, move your head.

1 · Predict 🧠

Read the code. Do **not** run it. Answer in the box.

```
fill black from (0, 4, 0) to (0, 4, 5)
```

Does the body go across, up, or deeper? Circle one. Which number changes — x, y, or z?

across · up · deeper

```
place black block at (0, 5, 6)
```

This is the head. Is the head higher or lower than the body? Circle one.

higher · lower

2 · Spot the Bug

This should make a **long body** along z, from (0, 4, 0) to (0, 4, 5). But it stays one block.

```
fill black from (0, 4, 0) to (0, 4, 0)
```

Fix it. Fill the blank so the body goes to z = 5.

```
fill black from (0, 4, 0) to (0, 4, ____)
```

Word bank: 5

Why was it wrong? One short sentence.

3 · Build It 📷

First build this tiny body on your home spot:

```
fill black from (0, 4, 0) to (0, 4, 3)
```

Now look at the dragon in your world. Copy it part by part: build a short black **body**, then place a black **head** block at the front. Add two **purple** eye blocks if you like.

```
fill black from (0, 4, 0) to (0, 4, 5)
place black block at (0, 5, 6)
```

Send a photo or video. Then finish these — 2 sentences.

I built the dragon's body and ...

My head block is at (x = ..., y = ..., z = ...).

4 · Explain It

Film yourself showing your small dragon. Try to use these words: **x, y, z, body, head.**

1. Show your home spot.
2. Point at the body. Say which number made it long.
3. Point at the head. Say its three numbers out loud.

Write 2 short sentences about your dragon:
