

M003 · Recreate the Ender Dragon (x, y, z) — English Worksheet (Beginner)

Topic: Recreate the Ender Dragon (x, y, z) · **Course:** 3D Coordinates · **Level:** Beginner · **Time:** about 30 minutes

A big blocky **ender dragon** is in your world; today you build a **small** one. Every block uses **(x, y, z)** — x **across**, y **up**, z **forward** (deep).

● Stand on your **home spot** (red block) every run. Move your feet, move your head.

1 · Predict 🧙

Read the code. Circle your answer.

```
fill black from (0, 4, 0) to (0, 4, 5)
```

Does the body go across, up, or deeper? Circle one: across · up · deeper

Which number changes? Circle one: x · y · z

```
place black block at (0, 5, 6)
```

This is the head. Higher or lower than the body? Circle one: higher · lower

2 · Spot the Bug 🐛

This should make a **long body** along z, from (0, 4, 0) to (0, 4, 5). But it stays one block.

```
fill black from (0, 4, 0) to (0, 4, 0)
```

Fix it. Fill the blank so the body goes to z = 5.

```
fill black from (0, 4, 0) to (0, 4, ____)
```

Which number fills the blank? Circle one: 5 · 0

Why was it wrong? Circle one: both corners had the same z · the color was wrong

3 · Show Your Work 📷 🎥

First build this tiny body on your home spot:

```
fill black from (0, 4, 0) to (0, 4, 3)
```

Look at the dragon in your world. Copy it part by part: build a short black **body**, then place a black **head** block at the front. Add two **purple** eye blocks if you like.

```
fill black from (0, 4, 0) to (0, 4, 5)  
place black block at (0, 5, 6)
```

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built ____.

I built it using this code: ____.

In this code I used ____.

The hardest part was ____.

That part was hard because ____.

The most fun part was ____.

Something new I learned was ____.
