

M004 · Your Function Library — Reusable Building Blocks — English Worksheet (Beginner)

Topic: Your Function Library — Reusable Building Blocks · **Course:** Functions & Games · **Level:** Beginner · **Time:** about 30 minutes

This lesson you collect your best functions into a **library** — reusable building blocks like `build_wall` and `build_tower`.

1 · Predict

```
function build_wall(length):  
  repeat length times:  
    place stone block  
    move forward 1  
  
build_wall(3)
```

Does this build a wall 3 blocks long? Circle one: yes · no

Why? Circle one: `build_wall(3)` is called · there is no call

```
function build_tower(height):  
  repeat height times:  
    place stone block  
    move up 1
```

No call line at the bottom. Does the tower get built? Circle one: yes · no

2 · Find the Difference 🐉

Pair A — The library should have **two different** functions with two different names.

```
# clean
function build_wall(length):
    place stone blocks

function build_glass_wall(length):
    place glass blocks
```

```
# buggy
function build_wall(length):
    place stone blocks

function build_wall(length):
    place glass blocks
```

What is wrong? Circle one: two functions share a name · two different names

Pair B — The tower should be **as tall as the number you give it**.

```
# clean
function build_tower(height):
    repeat height times:
        place stone block
        move up 1
```

```
# buggy
function build_tower(height):
    repeat 3 times:
        place stone block
        move up 1
```

What is wrong? Circle one: uses 3 not height · uses height not 3

3 · Fill the Gap

One word is missing.

```
function build_tower(height):  
  repeat ____ times:  
    place stone block  
    move up 1
```

Fill the gap. Circle one: height · tower · block

4 · Show Your Work 📷 🎥

Switch to your homework world. Build something using your own functions.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built ____.

I built it using this code: ____.

In this code I used ____.

The hardest part was ____.

That part was hard because ____.

The most fun part was ____.

Something new I learned was ____.
