

M000 · Placing Blocks — English Worksheet

Topic: Placing Blocks · **Course:** Builder Basics · **Time:** about 45 minutes

1 · Predict 🧠

Read each set of steps. Write what you think will happen.

```
place block down
move forward
place block down
move forward
place block down
```

How many blocks did the agent place? What does it look like?

```
place block down
turn right
move forward
place block down
```

Where are the two blocks compared to each other?

```
move up by 1
place block down
move up by 1
place block down
```

Are the blocks stacked, in a line, or floating? Explain.

2 · Spot the Bug 🐛

Each code block is broken. Read what it should do, rewrite it, then explain why the original was wrong.

Bug A — The agent is supposed to place a block, move forward, and place another block.

```
move forward  
place block down  
move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The agent is supposed to place a row of 3 blocks in a line.

```
place block down  
place block down  
place block down
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The agent is supposed to place 2 blocks stacked on top of each other.

```
place block down  
move forward  
place block down
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Show Your Work 📷 🎥

Switch to your homework world. Place **5 blocks** in different positions, using **2 different block types** (stone, dirt, wood — your choice).

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Fill the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

The most fun part was _____.

Something new I learned was _____.

Write your lines here, then say them in your video.
