

## M000 · Build a Village — English Worksheet (Beginner)

**Topic:** Build a Village (Final Project) · **Course:** Builder Basics · **Level:** Beginner · **Time:** about 45 minutes

### 1 · Predict 🧠

Read the steps. Circle your answer.

```
repeat 4 times:
  repeat 3 times:
    place block down
    move forward
  turn right
repeat 3 times:
  destroy block down
  move down by 1
```

**Which part of the village is this? Circle one:** house · well · farm

```
# Stage 1
[house]
# Stage 2
walk to next spot
[well]
```

**What must the agent do between the house and the well? Circle one:** walk to a new spot · dig down · turn around

**Why? Circle one:** so the well is not on the house · to dig faster · to turn around

---

## 2 · Find the Difference 🐛

Clean steps first, then a broken version. Circle the bug.

**Pair A** — The village should have a house **and** a well.

```
# clean
[house]
walk to next spot
[well]
```

```
# buggy
[house]
walk to next spot
```

**What is wrong? Circle one:** the well is missing · the house is missing · nothing moves

**Pair B** — The well must not land on top of the house.

```
# clean
[house]
walk to next spot
[well]
```

```
# buggy
[house]
[well]
```

**What is wrong? Circle one:** no walk, so the well lands on the house · the well is missing · it digs too deep

---

### 3 · Fill the Gap

Here is the skeleton of a small village. One stage is missing.

```
# Stage 1  
[house]  
# Stage 2  
walk to next spot  
_____
```

**Which stage is missing? Circle one:** [well] · [another house on top] · walk back to the house

---

## 4 · Show Your Work 📷 🎥

Build your **final project**: a small village with a **house** and **one more structure** — a well or a farm, your choice.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

**1 · Your code.** Scroll through it. Say what each part does.

**2 · Your build.** Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built \_\_\_\_\_.

I built it using this code: \_\_\_\_\_.

In this code I used \_\_\_\_\_.

The hardest part was \_\_\_\_\_.

That part was hard because \_\_\_\_\_.

The most fun part was \_\_\_\_\_.

Something new I learned was \_\_\_\_\_.
