

M003 Week 7 — English Worksheet (Intermediate)

Topic: Recreate 2 Mob Heads (x, y, z) · **Course:** 3D Coordinates · **Level:** Intermediate · **Time:** about 40 minutes

Two blocky **mob heads** stand in your world — a **creeper** and a **skeleton**. Each one is a cube with a face on the **front**. The trick: build the **front face first** (keep z the same, read x across and y up), then **add depth** by repeating the cube at z = 2, z = 3. Faces only show on the front; the sides and back are plain.

● Stand on your **home spot** (red block) every run. Move your feet, move your head.

1 · Predict

Read each set. Write what you will see.

```
fill green block from (0, 4, 1) to (4, 8, 1)
```

This fills a flat 5×5 wall at z = 1. Is it the front face or the depth? How many blocks deep is it so far?

```
fill green block from (0, 4, 1) to (4, 8, 1)
fill green block from (0, 4, 2) to (4, 8, 3)
```

The first line is the front face. What does the second line add? How deep is the head now?

```
place black block at (1, 7, 1)
place black block at (3, 7, 1)
```

Two eyes. Only x changes (1 then 3). Are they side by side across the front, or one behind the other?

2 · Spot the Bug 🐛

Fix each one. Then say why it was wrong.

Bug A — The head should be **3 blocks deep**. Right now it is only the flat front face — paper thin.

```
fill green block from (0, 4, 1) to (4, 8, 1)
```

Hint: add the same face again at $z = 2$ and $z = 3$.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The two eyes should sit **side by side on the front** (z stays 1, x changes). Right now the second eye went one step **deeper** and hid on the side.

```
place black block at (1, 7, 1)  
place black block at (1, 7, 2)
```

Hint: to move across the front, change x , keep $z = 1$.

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your homework world. Build the **creeper head**: front face first, then depth, then the face.

```
# front face (z = 1)
fill green block from (0, 4, 1) to (4, 8, 1)

# add depth (z = 2 and z = 3)
fill green block from (0, 4, 2) to (4, 8, 3)

# face on the front (z = 1)
place black block at (1, 7, 1)
place black block at (3, 7, 1)
place black block at (2, 6, 1)
place black block at (2, 5, 1)
place black block at (1, 4, 1)
place black block at (3, 4, 1)
```

Send a photo. When the creeper is done, start the **skeleton** head the same way (front face, then depth, then face) — but in white.

Now explain what you did. Use these sentence starters — write 4 to 6 sentences total.

I built the front face first by ...

To add depth I changed the ... number to 2 and 3.

My head is ... blocks deep.

The eyes and mouth stay on the front because their z is ...

One tricky moment was ...

For the second head I will ...

4 · Record Your Walkthrough 🎥

Film yourself showing your head. Try to use these words: **x, y, z, front face, depth, home spot.**

1. Show your home spot. Why stand on it every run?
2. Show the front face, then walk to a side — is the face on the side? Why not?
3. Point at one block: "this one is at x ..., y ..., z ...".
4. Say in your own words how you added depth.

Plan what you will say:
