

AI001 Week 3 — English Worksheet

Topic: Context and Examples · **Course:** AI Coding with Replit Agent · **Time:** about 45 minutes

This week you make your prompts smarter by adding **context** (who you are, what you like, who it is for) and **examples** ("make it like this site"). You also use **negative constraints** — telling the AI what *not* to do.

1 · Predict

Read each prompt. Before the AI builds it, write how the extra information will change the result.

Build a gallery site that shows cat photos.

This works, but the AI knows nothing about you. What might it guess wrong?

I'm 12 and I love cats. Build a gallery of cat photos, Pinterest-style cards, with cute warm colors.

The context and example were added. How will this result be different from the first?

Build a study site for me. Don't use complicated words, and don't make the buttons tiny.

Two "don't" rules were added. Why might telling the AI what NOT to do help?

2 · Spot the Weak Prompt 🦎

Each prompt below is missing context, an example, or a needed "don't" rule. Read what the student **wanted**, then rewrite it to add what is missing.

Prompt A — The student is **11** and wants their **first** project: a simple page about **soccer**, easy to understand.

```
Make a soccer page.
```

Hint: add who you are ("I'm 11, this is my first project") and a "keep it simple" rule.

Write a stronger prompt:

What context or constraint did you add?

Prompt B — The student wants their page to **look like the Naver homepage** layout.

```
Make a homepage with news on it.
```

Hint: give an example: "make the layout like the Naver homepage".

Write a stronger prompt:

What example did you give?

Prompt C — The student keeps getting **dark colors** and **hard words**, but they want **bright colors** and **simple words**.

Make a fun page about space.

Hint: add the example feel you want ("bright, cartoon-style") and the "don't" rules.

Write a stronger prompt:

What did you add?

3 · A Site About Something You Love 📷

Pick a topic you really like. Write **one prompt** that includes all three:

- **context** — who you are or who the site is for,
- **an example** — at least one site or style to copy ("like ____"),
- **a constraint** — at least one "don't" rule.

Run it in Replit. Send a **photo or video** of the result, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

My topic was ...

The context I gave the AI was ...

The example I used was "make it like ..."

The "don't" rule I added was ...

Adding context changed the result by ...

If I had more time, I would ...

4 · Save Your Best Prompt

Write the full prompt you used in part 3, word for word. Underline the **context**, circle the **example**, and box the **"don't" rule** so you can see all three parts.

Submit 

Send this worksheet + a photo (or video) of your site + the prompt you used to teacher on KakaoTalk.
