

RB004 Week 3 — English Worksheet (Beginner)

Topic: Round Timer — Countdown to Battle · **Course:** Arena Legends · **Level:** Beginner · **Time:** about 30 minutes

This week your arena gets a **round timer**. The server counts down with a **for** loop, and a TextLabel listens with **.Changed** so every player can watch the clock.

1 · Predict 🧠

Read the script. Before you imagine running it in Studio, circle or write your answer.

```
local timeLeft = game.ReplicatedStorage.TimeLeft -- IntValue

for t = 30, 0, -1 do
    timeLeft.Value = t
    task.wait(1)
end
```

Does the timer go down by 1 every second? Circle one: yes · no

Why?

```
timeLeft.Changed:Connect(function(newTime)
    label.Text = "Time: " .. newTime
end)
```

The server changes timeLeft.Value to 29. Does the label now show "Time: 29"? Circle one: yes · no

2 · Find the Difference 🦖

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The timer should count **down** from 30 to 0. It needs the **-1** step.

```
-- clean
for t = 30, 0, -1 do
  timeLeft.Value = t
  task.wait(1)
end
```

```
-- buggy
for t = 30, 0 do
  timeLeft.Value = t
  task.wait(1)
end
```

What is wrong? Why does the buggy loop never run?

Pair B — The wait must be **inside** the loop so the timer ticks once per second.

```
-- clean
for t = 30, 0, -1 do
  timeLeft.Value = t
  task.wait(1)
end
```

```
-- buggy
for t = 30, 0, -1 do
  timeLeft.Value = t
end
task.wait(1)
```

What is wrong?

3 · Fill the Gap

The timer should count **down** from 30 to 0, one number at a time. One thing is missing. Fill it in using the word bank.

```
for t = 30, 0, ____ do
  timeLeft.Value = t
  task.wait(1)
end
```

Word bank: -1 · 1 · 0

Write the missing word:

4 · Tell Me What You Built 📷

Now open your own arena game. Build a countdown timer with a `for` loop and show it on a `TextLabel`. When you finish, come back here.

Send a photo or video of the timer counting down on screen, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My **for** loop counts down because ...

The label updates when ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while your timer counts down. Talk like you are teaching a friend. Try to use these words: **countdown**, **loop**, **update**.

1. Show your script and read the **for** line out loud.
2. Run the game and show the label ticking down.
3. Say in your own words what **-1** does in the loop.

Write what you will say in your video. You can read from it while filming.
