

RB004 Week 6 — English Worksheet (Beginner)

Topic: Scoring & ModuleScripts — Team Points · **Course:** Arena Legends · **Level:** Beginner · **Time:** about 30 minutes

This week your arena learned to **count points** for Red and Blue, and you put your game settings in a **ModuleScript** — one shared box of values.

1 · Predict 🧠

Read the script. Before you imagine running it in Roblox Studio, circle or write your answer.

```
local points = {Red = 0, Blue = 0}

points["Red"] += 1
print(points.Red)
```

Does it print 1? Circle one: yes · no

Why?

```
local Settings = {}
Settings.WinScore = 5
return Settings
```

```
local Settings = require(game.ServerScriptService.Settings)
print(Settings.WinScore)
```

Does it print 5? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — A ModuleScript must **give back** its table at the end.

```
-- clean
local Settings = {}
Settings.WinScore = 5
return Settings
```

```
-- buggy
local Settings = {}
Settings.WinScore = 5
```

What is wrong? What line is missing?

Pair B — Dictionary keys care about capital letters.

```
-- clean
points["Red"] += 1
```

```
-- buggy
points["red"] += 1
```

What is wrong?

3 · Fill the Gap

The script should check if Red has **reached** the win score. One symbol is missing. Fill it in using the word bank.

```
if points.Red ____ Settings.WinScore then
  print("Red team wins!")
end
```

Word bank:  ·  · 

Write the missing symbol:

4 · Tell Me What You Built 📷

Now open your arena in Roblox Studio. Add points for Red and Blue and a winner check. When you finish, come back here.

Send a photo or video of a team scoring and winning, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

A team gets a point when ...

I put **WinScore** in a ModuleScript because ...

One tricky moment was when ...

5 · Record Your Walkthrough

Take a video on your phone (or a parent's phone) while you playtest your scoring in Roblox Studio. Talk like you are teaching a friend. Try to use these words: **points**, **ModuleScript**, **WinScore**.

1. Show your Settings ModuleScript and read the values out loud.
2. Press Play and score a point.
3. Say in your own words when a team wins.

Write what you will say in your video. You can read from it while filming.
