

WD001 Week 5 — English Worksheet

Topic: Images and Backgrounds — Visual Impact · **Course:** Web Design: CSS · **Time:** about 45 minutes

This week you make a big, bold **hero section** — a large background image with a heading sitting on top of it. You will use `background-image`, `background-size: cover` so the picture fills the space, and a dark overlay so white text stays readable on a busy photo.

1 · Predict 🧠

Read each bit of CSS. Before you imagine the browser drawing it, write what you think will happen.

```
<style>
  .hero {
    background-image: url('beach.jpg');
    height: 400px;
  }
</style>
```

A 400px-tall box with a background photo. Where does the photo appear?

```
<style>
  .hero {
    background-image: url('beach.jpg');
    background-size: cover;
  }
</style>
```

With `background-size: cover`, does the photo stretch to fill the whole box, or sit small in a corner?

```
<style>
  .hero {
    color: white;
    background-color: black;
  }
</style>
```

White text on a black background. Is the text easy or hard to read?

```
<style>
  .hero h1 {
    font-size: 48px;
    color: white;
  }
</style>
```

A 48px heading in white sitting on top of a photo. Do you think it looks small or like a big title?

2 · Spot the Bug 🐛

Each bit of CSS below was meant to do something, but it is broken. Read what it is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The hero is supposed to show a background image, but nothing appears.

```
<style>
.hero {
  background-image: beach.jpg;
  height: 400px;
}
</style>
```

Hint: a background image filename needs to be wrapped a certain way.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The photo is supposed to fill the whole hero box, but it sits small and tiles/repeats instead.

```
<style>
.hero {
  background-image: url('beach.jpg');
  height: 400px;
}
</style>
```

Hint: one line is missing that tells the image to fill the box.

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The heading is supposed to sit in the **middle** of the hero, but it is stuck in the top-left corner.

```
<style>
.hero {
  background-image: url('beach.jpg');
  background-size: cover;
  height: 400px;
}
</style>
```

Hint: centring needs `display: flex` plus a way to centre across and down.

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Build Your Hero Section 📷

In Replit, add a **hero section** to the top of your page. Use a photo you like as the background and put a heading and a short line on top of it.

You can start from this and change the photo and the words:

```
<div class="hero">
  <h1>Hi, I'm ____</h1>
  <p>A short line about me</p>
</div>

<style>
  .hero {
    background-image: url('background.jpg');
    background-size: cover;
    background-position: center;
    height: 400px;
    display: flex;
    flex-direction: column;
    justify-content: center;
    align-items: center;
    color: #ffffff;
    text-align: center;
  }
  .hero h1 {
    font-size: 48px;
  }
</style>
```

If your text is hard to read on a busy photo, try giving the hero a darker background colour or a semi-transparent overlay so the white text pops.

When you finish, send a **photo or video** of your hero (or a picture of your code), then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

The photo I chose for my hero is ...

`background-size: cover` made the image ...

I centred my heading by ...

To keep my text readable, I ...

One tricky moment was when ...

If I had more time, I would ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you show your hero section. Talk through it like you are teaching someone who has never made one. Try to use these words: **hero**, **background**, **cover**, **centre**, **readable**.

1. Show your hero section at the top of your page.
2. Read your `background-size: cover` line out loud and say what it does.
3. Show how your heading sits in the middle.
4. Show one thing you got wrong at first and how you fixed it.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
