

M000 Week 8 — English Worksheet (Intermediate)

Topic: Build a Village (Final Project) · **Course:** Builder Basics · **Level:** Intermediate · **Time:** about 38 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think it builds and why.

```
repeat 4 times:
  repeat 3 times:
    place block down
    move forward
  turn right
repeat 3 times:
  destroy block down
  move down by 1
```

Which part of the village is this — a house, a well, or a farm? How do you know?

```
# Stage 1
[house]
# Stage 2
move to next spot
[well]
# Stage 3
move to next spot
[farm]
```

This is the skeleton for the whole village. What does the agent do between each stage, and why does it matter?

2 · Spot the Bug 🐛

Each block below was meant to do something, but it is broken. Read the goal, then write a fixed version and explain the bug in one or two sentences.

Bug A — The village should have a **house and a well**, side by side.

Goal: the agent should end up with two structures, not one.

```
# buggy
[house]
move to next spot
```

Write the fixed skeleton:

What was missing, and why does your fix work?

Bug B — The well must **not** land on top of the house.

Hint: look at what is between the two structures.

```
# buggy
[house]
[well]
```

Write the fixed skeleton:

Why was the original wrong, and why does your fix work?

Bug C — The roof should sit **on top** of the walls, but here the agent stays on the ground after building the walls.

Hint: after the walls finish, the agent is still at ground level. Where does it need to be?

```
repeat 3 times:
  repeat 4 times:
    place block down
    move forward
  turn right
# now place the roof
repeat 3 times:
  place block down
  move forward
```

Write the fixed code:

Why was it wrong, and why does your fix work?

3 · Fill the Gap

Here is the skeleton of a three-part village. One stage is missing. Fill it in so all three structures end up in a row.

```
# Stage 1
[house]
move to next spot
# Stage 2
[well]
# Stage 3
move to next spot
_____
```

Write the missing stage, and explain why the agent needs the "move to next spot" line above it.

4 · Tell Me What You Built 📷

Now switch to your homework world and build your **final project**: a village with a **house and one more structure** — a well or a farm, your choice. Add a third structure if you have time. When you finish, come back here.

Send a photo or video of your village, then explain what you did. Use these sentence starters — write 3 or 4 sentences.

First, I built the ...

Then I built the ...

To move between structures, the agent ...

The thing I am most proud of is ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) and walk the camera through your village. Talk like you are teaching a friend who has never seen it. Try to use these words: **village, house, roof, well, farm.**

1. Walk around the village and show each building one by one.
2. Say which building you made first and which came next.
3. Show one bug you hit and how you fixed it.
4. Say what you would add next if you had more time.

Write what you will say in your video. Plan it here first — you can read from it while filming.
