

M001 Week 1 — English Worksheet

Topic: First Hello with the Agent · **Course:** Pyramid Problems · **Time:** about 45 minutes

1 · Predict 🧠

Read each set of steps. Before you imagine the agent doing it, write what you think will happen.

```
move forward
place block down
move forward
place block down
```

How many blocks did the agent place? Are they next to each other or apart?

```
turn right
move forward
turn right
move forward
```

Which direction is the agent facing at the end?

```
move up by 2
place block down
move up by 2
place block down
```

Are the two blocks side by side, stacked, or floating? Explain.

2 · Spot the Bug 🐛

Each block of code below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The agent is supposed to place a block, then move forward, then place another block.

```
place block down  
place block down  
move forward
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The agent is supposed to face right and then move 3 steps forward.

```
move forward  
move forward  
move forward  
turn right
```

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The agent is supposed to place 3 blocks side by side in a straight line.

```
place block down
move up by 1
place block down
move up by 1
place block down
```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now switch to your homework world. Build a **7-block straight path** by moving and placing one block at a time. Then build it once more with a **different block type** (stone, dirt, or wood — your choice). When you finish, come back here.

Send a photo or video of what you built, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

First, I told the agent to ...

Then I ...

The hardest part was ...

To fix it, I ...

My favourite command was ...

If I had more time, I would ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you walk the camera around what you built. Talk through it like you are teaching someone who has never seen it. Try to use these words: **agent, place, move, turn, block.**

1. Show the agent and what it built.
2. Read your commands out loud one by one and say what each one does.
3. Show one bug you hit and how you fixed it.
4. Say which command you used the most.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
