

M002 Week 6 — Redstone & Levers

Topic: Redstone Levers · **Course:** Maze Madness · **Level:** Intermediate · **Time:** about 35 minutes

This week the maze has a **lever**. The agent flips the lever with `interact` to open a closed redstone door, then walks through to the goal.

1 · Predict 🧠

Read the steps. Write what the agent does.

```
move forward
interact ahead
move forward
```

The agent flips the lever. What happens to the door?

```
interact ahead
move forward
move forward
```

There is no lever in front. What happens?

2 · Plain to API

Match the plain words to the real code line.

Plain words	Code
flip the lever in front	<code>agent.move(FORWARD, 1)</code>
step forward one block	<code>agent.interact(...)</code>
is there redstone ahead?	<code>agent.detect(REDSTONE, FORWARD)</code>

Write each pair:

3 · Trace the Code 🔍

```
while not agent.detect(REDSTONE, FORWARD):  
    agent.move(FORWARD, 1)  
agent.interact(...)  
agent.move(FORWARD, 1)  
agent.move(FORWARD, 1)
```

What does the agent do? Write it in plain English.

4 · Fix the Bug 🐛

The agent should walk **up to** the lever, then flip it **once**. This flips on every step.

```
while not agent.detect(REDSTONE, FORWARD):  
    agent.move(FORWARD, 1)  
    agent.interact(...)
```

Write the fixed code:

One line: why was it wrong?

5 · Finish the Maze 📷

Open your homework world. Write code that:

1. moves the agent to the lever,
2. flips it with `interact` ,
3. walks through the open door to the goal.

Send a photo or video of the agent at the end. Then write 3 sentences.

I used `interact` to ...

Once the door opened, the agent ...

The hardest part was ...

Phone video plan. Film the agent running the maze. Say these words: **lever, interact, door, open.**

1. Show the closed door and the lever.
2. Run your code. Show the agent flip the lever.
3. Say which line opens the door.
