

M003 Extension — English Worksheet (Beginner)

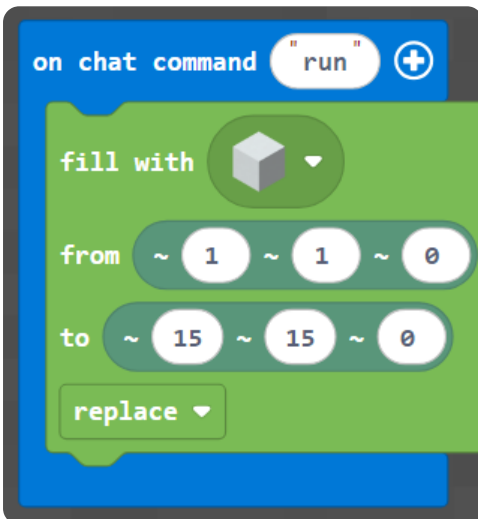

Topic: Pixel-Art Mobs (x, y) · **Course:** 3D Coordinates · **Level:** Extension (Beginner, after Week 3) ·

Time: about 30 minutes

This is a **bonus picture challenge** between Week 3 and Week 4. You copy a mob onto your wall using (x, y). x is how far **across**. y is how far **up**. Read the picture and place each block at its (x, y).

First, build your canvas. Run this to make a blank 15 × 15 wall, then put a **red block at your feet** as your **home spot**:

Blocks

Python

```
def on_run():
    blocks.fill(WHITE_CONCRETE,
                pos(1, 1, 0),
                pos(15, 15, 0),
                FillOperation.REPLACE)
    player.on_chat("run", on_run)
```

● **Stand on the red block every time you run.** If you move, the picture moves too and the blocks land in the wrong place. Same spot every time = a clean picture.

1 · Predict 🧠

Read the steps. Before you imagine it happening, circle and write your answer.

```
place pink block at (4, 13)
place pink block at (5, 13)
place pink block at (6, 13)
```

Do these blocks make a line going across or up? Circle one: across · up

Which number stays the same — x or y?

```
place black block at (8, 7)
place black block at (8, 8)
```

Do these blocks go across or up? Circle one: across · up

Which number changes — x or y?

2 · Spot the Bug 🐛

This code is broken. Read what it should do, then fill in the fix.

Bug — The axolotl's two eyes should be at **two different spots**: (6, 10) and (11, 10). Right now both blocks land in the **same spot**.

```
place black block at (6, 10)
place black block at (6, 10)
```

Hint: the first number (x) of the second eye is wrong. One eye is further **across** than the other, so its x must be **bigger**.

Fill the blank to fix the second line:

```
place black block at (6, 10)
place black block at (__ , 10)
```

Word bank for the blank: 6 · 11

In one short sentence: why was the code wrong?

3 · Build It 📷

Stand on your **home spot** (the red block).

Warm up first. Copy this small axolotl frill onto your wall. Read each pink square's (x, y) and place a pink block there.

 Axolotl frill

	1	2	3	4	5
5					
4					
3					
2					
1					

Now try the big one. Copy the big 🐡 axolotl below. Read each colored square and place that color at its (x, y).

 Axolotl (pink · #f2a3c0, frills · #ff5fa2, eyes · black)

[illegible]

When your picture is finished, send a photo of it, then explain what you did. Use these sentence starters — write 3 to 5 sentences total.

First, I built the ...

One block in my picture is at $(x = \dots, y = \dots)$.

4 · Explain It

Take a short video on your phone (or a parent's phone) while you show your axolotl on the wall. Try to use these words: **x, y, across, up, home spot**.

1. Show your home spot (the red block).
2. Show your finished axolotl.
3. Point at one block and read its coordinate: "this one is at x ..., y ...".

Now write 2 short sentences about your picture. You can read them in your video.
