

RB003 Week 6 — English Worksheet (Beginner)

Topic: Saving with DataStores — Keep Cash After Leaving · **Course:** Tycoon Engineer · **Level:** Beginner · **Time:** about 30 minutes

This week your tycoon remembers. A **DataStore** saves each player's cash when they leave and loads it when they join again. To test saving in Studio, turn on **Game Settings** → **Security** → **Enable Studio Access to API Services**.

1 · Predict 🧠

Read the script. Before you imagine it running in Studio, circle or write your answer.

```
Players.PlayerRemoving:Connect(function(player)
    pcall(function()
        store:SetAsync(player.UserId, cash.Value)
    end)
end)
```

A player is still playing the game. Does this code save right now? Circle one: yes · no

Why?

```
if saved ~= nil then
    cash.Value = saved
else
    cash.Value = 0
end
```

A new player joins for the first time, so **saved** is **nil**. Does their cash become 0? Circle one: yes · no

2 · Find the Difference 🐉

Each pair shows clean code first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The save key must be something that **never changes**.

```
-- clean
store:SetAsync(player.UserId, cash.Value)
```

```
-- buggy
store:SetAsync(player.Name, cash.Value)
```

What is wrong? What happens if the player changes their username?

Pair B — Saving should be **safe** — if saving fails, the game keeps running.

```
-- clean
pcall(function()
    store:SetAsync(player.UserId, cash.Value)
end)
```

```
-- buggy
store:SetAsync(player.UserId, cash.Value)
```

What is wrong? What happens in the buggy version if saving fails?

3 · Fill the Gap

When a player joins, the game should **load** their saved cash. One word is missing. Fill it in using the word bank.

```
local saved = store:____(player.UserId)
```

Word bank: GetAsync · SetAsync · Clone

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your tycoon in Roblox Studio. Add saving with a DataStore. When you finish, come back here.

Send a photo or video of your cash coming back after you rejoin, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My game saves cash when ...

When I joined again, ...

One tricky moment was when ...

5 · Record Your Walkthrough 🎥

Take a video on your phone (or a parent's phone) while you test saving. Talk like you are teaching a friend. Try to use these words: **save, load, DataStore**.

1. Earn some cash, then stop the test (this is "leaving").
2. Play again and show your cash is still there.
3. Say in your own words what a **DataStore** does.

Write what you will say in your video. You can read from it while filming.
