

M003 Week 6 — English Worksheet (Intermediate)

Topic: Recreate the Ender Dragon (x, y, z) · **Course:** 3D Coordinates · **Level:** Intermediate · **Time:** about 40 minutes

A big blocky **ender dragon** stands in your world — black blocks, purple eyes. A big model is just a set of **parts**: a long **body**, a **head** at the front, and two **wings** that spread out. Today you build the body, the head, and two simple wings. Every block uses **(x, y, z)** — x **across**, y **up**, z **forward** (deep). The body runs **long along z**. The wings **spread along x**.

● Stand on your **home spot** (red block) every run. Move your feet, move your head.

1 · Predict 🌟

Read each snippet. Do **not** run it. Write a full-sentence prediction.

```
fill black from (0, 6, 0) to (0, 6, 8)
```

One block wide, long along z. Which way does it run, and how long is it?

```
fill black from (1, 6, 4) to (4, 6, 4)
```

This is one wing. Which number changes? Does it go left/right (x), up (y), or deep (z)?

```
fill black from (0, 6, 0) to (0, 6, 8)  
place black block at (0, 7, 9)
```

The body, then the head. Is the head in front of the body or behind it? Higher or the same height?

2 · Spot the Bug 🐛

Bug A — This should be a **long body** running deep (along z), from (0, 6, 0) to (0, 6, 8). Right now it is only one block.

```
fill black from (0, 6, 0) to (0, 6, 0)
```

Write the fixed code:

Why was it wrong? Why does your fix work? 1–2 sentences.

Bug B — This should be a **wing** spreading out to the side (along x), from (1, 6, 4) to (4, 6, 4). Right now it grows **up** instead of out.

```
fill black from (1, 6, 4) to (1, 9, 4)
```

Write the fixed code:

Why was it wrong? Why does your fix work? 1–2 sentences.

3 · Build It

Look at the dragon in your world. Walk around it. Then copy it on your home spot, part by part:

```
fill black from (0, 6, 0) to (0, 6, 8)
place black block at (0, 7, 9)
fill black from (1, 6, 4) to (4, 6, 4)
fill black from (-4, 6, 4) to (-1, 6, 4)
```

That is body, head, right wing, left wing. Add two **purple** eye blocks on the head. Make the wings match — the same length on both sides.

Send a photo or video. Then finish these — about 4 sentences.

First I built the body. It runs deep, so I changed the ... number.

My head block is at (x = ..., y = ..., z = ...).

The right wing goes from (... , ... , ...) to (... , ... , ...).

To make the left wing match, I ...

4 · Explain It 🎥

Film yourself showing your dragon. Use these words: **x, y, z, body, head, wing.**

1. Show your home spot. Why stand on it every run?
2. Point at the body. Say which number made it long.
3. Point at one wing. Say which number made it spread out.
4. Show that both wings are the same length.

Write about 4 sentences about how you built your dragon:
