

RB002 Week 6 — English Worksheet (Beginner)

Topic: Functions with Parameters & Returns · **Course:** Story Quest · **Level:** Beginner · **Time:** about 30 minutes

This week you write functions that take **parameters** and give back **return** values. A parameter is a slot in the function. You fill the slot when you **call** the function.

1 · Predict

Read the script. Before you imagine it running in Roblox Studio, circle or write your answer.

```
local function giveReward(player, amount)
    player.leaderstats.Coins.Value += amount
end

giveReward(player, 50)
```

Does the player get 50 coins? Circle one: yes · no

Why?

```
local function questComplete(count)
    return count >= 5
end

print(questComplete(2))
```

Does this print **true** ? Circle one: yes · no

2 · Find the Difference 🐉

Each pair shows a clean script first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The call should fill **both** slots: the player and the amount.

```
-- clean
giveReward(player, 50)
```

```
-- buggy
giveReward(player)
```

What is wrong? What is missing in the buggy call?

Pair B — The function should **return** the answer.

```
-- clean
local function questComplete(count)
    return count >= 5
end
```

```
-- buggy
local function questComplete(count)
    count >= 5
end
```

What is wrong? Which word is missing?

3 · Fill the Gap

The function should give back `true` when the count is 5 or more. One word is missing. Fill it in using the word bank.

```
local function questComplete(count)
  _____ count >= 5
end
```

Word bank: `return` · `print` · `local`

Write the missing word:

4 · Tell Me What You Built 📷

Now open your Story Quest game in Roblox Studio. Write a `giveReward` function and call it with two arguments. When you finish, come back here.

Send a photo or video of your function working, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My function `giveReward` takes ...

I called it with ...

One tricky moment was when ...

5 · Record Your Walkthrough

Take a video on your phone (or a parent's phone) while you play your game in Studio. Talk like you are teaching a friend. Try to use these words: **function**, **parameter**, **call**.

1. Open your script and read your `giveReward` function out loud.
2. Press Play and show the reward happening in the game.
3. Say in your own words what a **parameter** is.

Write what you will say in your video. You can read from it while filming.
