

RB004 Week 7 — English Worksheet

Topic: Build Week — Your Full Arena Game · **Course:** Arena Legends · **Time:** about 45 minutes

No new syntax this week. You already know everything: Teams, the countdown timer, RemoteEvents, power-ups, points, and your Settings ModuleScript. This week you connect it all into **one full round loop** — and you design **your own** arena game.

1 · Predict 🧠

This is a full round loop, like the one in your game. Read each part. Before you imagine running it in Roblox Studio, write what you think will happen.

```
local Settings = require(game.ServerScriptService.Settings)
local status = game.ReplicatedStorage.Status
local timeLeft = game.ReplicatedStorage.TimeLeft
local points = {Red = 0, Blue = 0}

while true do
    status.Value = "Intermission..."
    task.wait(10)

    status.Value = "FIGHT!"
    points.Red = 0
    points.Blue = 0
end
```

What do players see on screen first, and for how long? Why do we set both points back to 0 here?

```
for i = Settings.RoundLength, 0, -1 do
    timeLeft.Value = i
    task.wait(1)
end
```

RoundLength is 60. What does **timeLeft.Value** count — up or down? About how many seconds does this part take?

```
if points.Red > points.Blue then
    status.Value = "Red team wins!"
elseif points.Blue > points.Red then
    status.Value = "Blue team wins!"
else
    status.Value = "It's a tie!"
end
task.wait(5)
end
```

Red has 3 points and Blue has 3 points when the timer ends. What does the status say? What happens after the 5-second wait — does the game stop?

2 · Spot the Bug 🐛

Each round loop below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — Every round should start fresh at 0–0. But in this game, round 2 starts with last round's points, so one team wins instantly.

```
while true do
  status.Value = "Intermission..."
  task.wait(10)

  status.Value = "FIGHT!"

  for i = Settings.RoundLength, 0, -1 do
    timeLeft.Value = i
    task.wait(1)
  end
end
```

Write the fixed code (just the part you change or add):

Why was it wrong? Why does your fix work?

Bug B — The winner should be announced **after** the timer ends. In this game, "Red team wins!" appears the moment the round starts, before anyone even scores.

```

status.Value = "FIGHT!"
points.Red = 0
points.Blue = 0

if points.Red >= points.Blue then
    status.Value = "Red team wins!"
end

for i = Settings.RoundLength, 0, -1 do
    timeLeft.Value = i
    task.wait(1)
end

```

Write the fixed code (just the part you change or move):

Why was it wrong? Why does your fix work?

Bug C — The countdown should take one second per number. In this game, the timer jumps from 60 to 0 instantly and the round ends right away.

```

for i = Settings.RoundLength, 0, -1 do
    timeLeft.Value = i
end

```

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now open Roblox Studio and build your full arena game: round loop, teams, timer, power-ups, points, winner check. **You are the designer** — you choose the game mode. When you finish, come back here.

Send a photo or video of one full round, then explain your design. Use these sentence starters — write 4 to 6 sentences total.

My game mode is ...

A team scores a point when ...

I put my power-ups ... because ...

My round length is ... seconds because ...

One tricky moment was when ...

If I had more time, I would ...

4 · Record Your Walkthrough

Now take a video on your phone (or a parent's phone) while you playtest one full round. In Roblox Studio, use **Test** → **2 Players** so both teams have a player. Talk through it like you are teaching someone who has never seen it. Try to use these words: **round loop**, **intermission**, **countdown**, **points**, **winner**.

1. Start the 2-player test and show the intermission message.
2. When the round starts, score a point and show the score changing for both test players.
3. Grab a power-up and show what it does.
4. Let the timer reach 0 and show the winner message. Check out loud: did the points reset for the next round?

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
