

RB005 Week 4 — English Worksheet

Topic: Game Feel — Juice with Tweens and Sound · **Course:** Dream Game Studio · **Time:** about 45 minutes

Juice is the little touches that make a game feel alive: smooth movement and sound. This week you add juice to your game with `TweenService` and `Sound`.

1 · Predict 🧠

Read each script. Before you run it in Studio, write what you think will happen.

```
local TweenService = game:GetService("TweenService")
local door = workspace.Door

local info = TweenInfo.new(0.5)
local tween = TweenService:Create(door, info, {Position = door.Position +
Vector3.new(0, 6, 0)})
tween:Play()
```

What does the door do? How far does it go, and how long does it take?

```
local TweenService = game:GetService("TweenService")
local star = workspace.WinStar

local info = TweenInfo.new(2)
local tween = TweenService:Create(star, info, {Transparency = 1})
tween:Play()
```

What does the player see happen to the star over 2 seconds?

```
local pad = script.Parent
local sound = pad.PopSound

pad.Touched:Connect(function(hit)
    sound:Play()
end)
```

PopSound is a Sound inside the pad with its SoundId already set. When does the sound play? A player stands on the pad and wiggles — does it play once or many times?

2 · Spot the Bug 🐛

Each block of code below was meant to do something, but it is broken. Read what the code is **supposed** to do, then rewrite it so it works. After that, explain why the original was wrong and why your fix works.

Bug A — The door should slide up smoothly. The script runs with no errors — but the door never moves.

```
local TweenService = game:GetService("TweenService")
local door = workspace.Door

local info = TweenInfo.new(0.5)
local tween = TweenService:Create(door, info, {Position = door.Position +
Vector3.new(0, 6, 0)})
```

Hint: the tween was created ... but was it ever started?

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug B — The secret wall should fade away in **half a second**. Instead it fades so slowly nobody ever notices.

```
local TweenService = game:GetService("TweenService")
local wall = workspace.SecretWall

local info = TweenInfo.new(500)
local tween = TweenService:Create(wall, info, {Transparency = 1})
tween:Play()
```

Hint: `TweenInfo.new` takes **seconds**. How long is 500 seconds?

Write the fixed code:

Why was it wrong? Why does your fix work?

Bug C — The script should make a sound and play it. It runs with no errors — but you hear nothing.

```
local sound = Instance.new("Sound")
sound.Parent = script.Parent
sound:Play()
sound.SoundId = "rbxassetid://9118823106"
```

Hint: look at the **order** of the lines. What was the SoundId when `Play()` ran?

Write the fixed code:

Why was it wrong? Why does your fix work?

3 · Tell Me What You Built 📷

Now open your game and add juice: at least **one tween** and **one sound** on a moment that matters (winning, picking up, opening a door). When it feels good, come back here.

Send a photo or video of the juicy moment, then explain what you did. Use these sentence starters — write 4 to 6 sentences total.

I added a tween to ...

My TweenInfo time is ... seconds because ...

My sound plays when ...

Before the juice, that moment felt ... Now it feels ...

One tricky moment was when ...

To fix it, I ...

4 · Record Your Walkthrough 🎥

Now take a video on your phone (or a parent's phone) while your game runs. Talk through it like you are teaching someone who has never seen it. Try to use these words: **TweenService**, **TweenInfo**, **tween**, **sound**, **juice**.

1. Show the moment BEFORE the juice triggers, then trigger it.
2. Open your script, show the tween, and read your **TweenInfo** time out loud.
3. Trigger your sound and say which event plays it.
4. Say in your own words what **juice** adds to a game.

Write what you will say in your video. Use the space below to plan it before you record — you can read from it while filming.
