

# The Trail Maker

**Builder Basics · Bonus · about 20 minutes**

 Type `run` and watch the agent build!

## 1 · ON and OFF 🧐

The agent walks. A switch is **ON** or **OFF**.

| Switch                                                                                | The agent drops...                                                                                                                                                                                                                                                                                                                             |
|---------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ON   |     blocks |
| OFF  | nothing (empty)                                                                                                                                                                                                                                                                                                                                |

**ON = blocks. OFF = no blocks.**

---

## 2 · Circle It

Switch is **ON**. Circle one:

☐ **blocks** · ☐ **no blocks**

Switch is **OFF**. Circle one:

☐ **blocks** · ☐ **no blocks**

---

### 3 · Find the Gap 🔍

The agent made this trail:

The empty part is the **gap**.

**Circle the gap.**

At the gap, the switch was... circle one:

**ON · OFF**

---

## 4 · Show Your Work

1. Open the **Trail Maker** world.
2. Type **run** . Press enter.
3. Watch!        

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

**1 · Your code.** Scroll through it. Say what each part does.

**2 · Your build.** Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built \_\_\_\_\_.

I built it using this code: \_\_\_\_\_.

In this code I used \_\_\_\_\_.

The hardest part was \_\_\_\_\_.

That part was hard because \_\_\_\_\_.

The most fun part was \_\_\_\_\_.

Something new I learned was \_\_\_\_\_.
