

▼ M000 · Inverted Pyramid — English Worksheet (Beginner)

Topic: Inverted Pyramid · **Course:** Builder Basics · **Level:** Beginner · **Time:** about 30 minutes

An **inverted** pyramid is upside down: the **smallest** layer is at the bottom and the **biggest** is at the top.

1 · Predict 🧠

Read the steps. Circle your answer.

```
set size to 1
while size <= 5:
    [build one size × size square layer]
    move up by 1
    set size to size + 2
```

Each new layer gets ... Circle one: bigger · smaller

Where is the widest layer? Circle one: bottom · top

```
set size to 1
while size <= 5:
    [build one size × size square layer]
    move up by 1
    set size to size + 2
```

The sizes go 1, then ..., then ... Circle one: 1 · 3 · 5 → 1 · 2 · 3

2 · Find the Difference 🐛

Clean steps first, then a buggy version. Circle the bug.

Pair A — The pyramid should be **inverted**: it starts small and grows.

```
# clean
set size to 1
while size <= 5:
    [build layer]
    move up by 1
    set size to size + 2
```

```
# buggy
set size to 5
while size > 0:
    [build layer]
    move up by 1
    set size to size - 2
```

What is wrong? Circle one: it builds a normal pyramid (wide bottom) · it builds an inverted pyramid · it builds a flat floor

Pair B — Each layer must sit **on top** of the one below.

```
# clean
while size <= 5:
    [build layer]
    move up by 1
    set size to size + 2
```

```
# buggy
while size <= 5:
    [build layer]
    set size to size + 2
```

What is wrong? Circle one: it never moves up · it moves up too far · it turns the wrong way

3 · Fill the Gap

The inverted pyramid should **grow** by 2 each layer. Fill the missing line.

```
set size to 1
while size <= 5:
    [build layer]
    move up by 1
    _____
```

Missing line? Circle one: set size to size + 2 · set size to size - 2 · turn right

4 · Show Your Work 📷 🎥

Switch to your homework world. Build an inverted pyramid that grows from **size 1 up to size 5**, then check the shape from the side.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built _____.

I built it using this code: _____.

In this code I used _____.

The hardest part was _____.

That part was hard because _____.

The most fun part was _____.

Something new I learned was _____.
