

## M000 · Agent Movement — English Worksheet (Beginner)

**Topic:** Agent Movement · **Course:** Builder Basics · **Level:** Beginner · **Time:** about 30 minutes

### 1 · Predict 🧠

Read the steps. Circle your answer.

```
move forward  
move forward
```

**How many steps does the agent take? Circle one:** 1 · 2 · 3

**Where is the agent now? Circle one:** 2 steps ahead · back at the start · up high

```
move forward  
turn right  
move forward
```

**Does the agent walk in a straight line? Circle one:** yes · no

**What does `turn right` change? Circle one:** the way it faces · its height · the block it holds

---

## 2 · Find the Difference 🐛

Clean steps first, then a broken version. Circle the bug.

**Pair A** — The agent should walk 3 steps forward.

```
# clean
move forward
move forward
move forward
```

```
# buggy
move forward
move forward
```

**What is wrong? Circle one:** one step missing · one step extra · a wrong turn

**Pair B** — The agent should walk forward, then turn right.

```
# clean
move forward
turn right
```

```
# buggy
turn right
move forward
```

**What is wrong? Circle one:** wrong order · a step is missing · an extra turn

---

### 3 · Fill the Gap

The agent goes forward 2 steps, then **up** 2 blocks. One line is missing.

```
move forward
```

```
move forward
```

```
_____
```

**Which line is missing? Circle one:** move up by 2 · turn right · move forward

---

## 4 · Show Your Work 📷 🎥

Switch to your homework world. Move your agent **5 steps forward**, then make it **turn once**.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

**1 · Your code.** Scroll through it. Say what each part does.

**2 · Your build.** Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built \_\_\_\_.

I built it using this code: \_\_\_\_.

In this code I used \_\_\_\_.

The hardest part was \_\_\_\_.

That part was hard because \_\_\_\_.

The most fun part was \_\_\_\_.

Something new I learned was \_\_\_\_.
