

M003 Week 2 — English Worksheet (Beginner)

Topic: Lines and Grids · **Course:** 3D Coordinates · **Level:** Beginner · **Time:** about 30 minutes

This week you place a **line of blocks with a loop**. One number stays the same, the other grows by 1 each time.

1 · Predict

Read the steps. Before you imagine it happening, circle or write your answer.

```
set z to 0
repeat 3 times:
  place stone block at (2, z)
  add 1 to z
```

z grows by 1 each time. Do the blocks make a line? Circle one: yes · no

Why?

```
repeat 3 times:
  place stone block at (2, 0)
```

The numbers never change. Do the blocks land in different spots? Circle one: yes · no

2 · Find the Difference 🐛

Each pair shows clean steps first, then a broken version of the same idea. Circle what's different and write one short sentence about the bug.

Pair A — The loop should make a line. The blocks need to **move along** after each place.

```
# clean
set z to 0
repeat 4 times:
  place stone block at (3, z)
  add 1 to z
```

```
# buggy
set z to 0
repeat 4 times:
  place stone block at (3, z)
```

What is wrong? Where do all the buggy blocks land?

Pair B — The line should be **4 blocks long**.

```
# clean
set x to 0
repeat 4 times:
  place gold block at (x, 0)
  add 1 to x
```

```
# buggy
set x to 0
repeat 3 times:
  place gold block at (x, 0)
  add 1 to x
```

What is wrong?

3 · Fill the Gap

The loop should make a line that grows along z. One word is missing. Fill it in using the word bank.

```
set z to 0
repeat 4 times:
  place stone block at (2, z)
  ____ 1 to z
```

Word bank: add · take · move

Write the missing word:

4 · Tell Me What You Built 📷

Now switch to your homework world. Use a loop to build a **line of blocks**, then try a second line to start a square. When you finish, come back here.

Send a photo or video of your lines, then explain what you did. Use these sentence starters — write 2 or 3 sentences.

My loop repeated ... times because ...

The number that grew was ...

One tricky moment was when ...

5 · Record Your Walkthrough

Take a video on your phone (or a parent's phone) while you show your line in the world. Talk like you are teaching a friend. Try to use these words: **loop**, **line**, **repeat**, **grow**.

1. Show your line, then show the code that built it.
2. Read your loop out loud and say which number grows.
3. Say in your own words why a loop is faster than placing blocks one by one.

Write what you will say in your video. You can read from it while filming.
