

## Builder Basics — Complete Your Village (Extension · Intermediate)

**Topic:** Bring It All Together · **Course:** Builder Basics · **Level:** Intermediate · **Type:** Extension Activity ·  
**Time:** about 45 minutes

 This is a bonus challenge, not a main lesson. Try it after the village project, once you can build with loops and move the agent between spots.

### 1 · The Challenge

Finish your village so it feels like a place someone could live. There is no map — **you** choose the sizes and where things go, and it must have **all four**:

 A house with a roof  A well  A small pond  A small flower bed

 One rule: **everything is built with code.** No placing blocks by hand.

**Why does "build it with code" matter more than how it looks?**

|--|
|  |
|  |
|  |
|  |

## 2 · Plan the Four Parts

Fill in the table. For each structure, note the main block you will use and whether it needs a loop.

| Structure                                                                                          | Main block(s) | Loop? (yes / no) |
|----------------------------------------------------------------------------------------------------|---------------|------------------|
|  House + roof     |               |                  |
|  Well             |               |                  |
|  Small pond       |               |                  |
|  Small flower bed |               |                  |

|  |
|--|
|  |
|  |
|  |
|  |

**Pick the two hardest structures to build. What makes each one tricky?**

|  |
|--|
|  |
|  |
|  |
|  |

---

### 3 · Think in Loops

A loop is for anything you repeat — a row of wall blocks, a row of flowers, the four sides of a well.

**Choose one structure. Describe the loop: what does it repeat, and how many times?**

|  |
|--|
|  |
|  |
|  |
|  |

**Between one structure and the next, what must the agent do so builds don't land on top of each other?**

|  |
|--|
|  |
|  |
|  |
|  |

## 4 · Show Your Work 📷 🎥

Go to your homework world and build one structure at a time, moving the agent between them. Keep going until the village has **the house with a roof, the well, the small pond, and the small flower bed** — all placed by code.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

**1 • Your code.** Scroll through it. Say what each part does.

## 2 • Your build.

Fill the blanks:

Today I built \_\_\_\_\_.

I built it using this code: \_\_\_\_\_.

In this code I used \_\_\_\_\_.

The hardest part was \_\_\_\_\_.

That part was hard because \_\_\_\_\_.

The most fun part was \_\_\_\_\_.

Something new I learned was \_\_\_\_\_.

**Write your lines here, then say them in your video.**

**Submit**
