

Maze Madness · Redstone & Levers

Topic: Redstone Levers · **Course:** Maze Madness · **Level:** Beginner · **Time:** about 25 minutes

The maze has a **lever**. Flip it and the door opens.

1 · Predict

```
move forward
interact ahead
move forward
```

Agent flips the lever. The door does what? Circle one: opens · closes · nothing

```
interact ahead
```

No lever here. What happens? Circle one: door opens · nothing

2 · Find the Difference 🐛

Pair A — Flip the lever first. Then walk.

```
# clean
move forward
interact ahead
move forward
```

```
# buggy
move forward
move forward
interact ahead
```

What does the buggy agent hit? Circle one: the closed door · the lever · the goal

Pair B — Walk up to the lever. Flip once.

```
# clean
while no lever ahead:
    move forward
interact ahead
```

```
# buggy
while no lever ahead:
    move forward
    interact ahead
```

How many times does the buggy agent flip? Circle one: once · many times · never

3 · Fill the Gap

The agent is in front of the lever. One line is missing.

```
_____
move forward
```

```
move forward
```

Missing line? Circle one: interact ahead · turn right

4 · Show Your Work 📷 🎥

Open your homework world. Walk the agent to the lever. Flip it. Go through the door to the goal.

Record **one video** — one take, no stopping (a phone is fine). Show these in order:

1 · Your code. Scroll through it. Say what each part does.

2 · Your build. Point the camera. Name the parts.

Say these out loud, filling in the blanks:

Today I built ____.

I built it using this code: ____.

In this code I used ____.

The hardest part was ____.

That part was hard because ____.

The most fun part was ____.

Something new I learned was ____.
